# Subject Index of Papers Published in Volume 92 of the *Journal of Dairy Science*

## A

acarbose, dairy cow, milk yield, subacute ruminal acidosis, 4481
  monensin, acute acidosis, 2758
accelerated ripening, Cheddar cheese, crosslinked β-cyclodextrin, cholesterol removal, 49
acceptability, camel milk, flavored yogurt, sensory quality, 857
  yogurt, date fiber, sensory quality, 5403
*Acetobacter orientalis*, Caspian Sea yogurt, lactobionic acid, 25
acid gelation, milk coagulation, casein supramolecule, 5854
acid skim milk gel, gel structure, glucono-δ-lactone, oxidoreduction potential, 5898
acid-base status, dairy cow, potassium, dietary cation–anion difference, 6123
acidosis, behavior, rumination, 5067
  modeling, dairy goat, off-feed, 3894
  physically effective fiber, chewing, ruminal pH, 1603
active coating, modified-atmosphere packaging, shelf life, Fior di Latte cheese, 887
activity, lying, standing, validation, 3397
activity meter, heritability, estrus, fertility, 4683
acute acidosis, acarbose, dairy cow, monensin, 2758
acute phase protein, dairy cow, innate immunity, mastitis, 980
acute phase response, liver biopsy, gene expression, mastitis, 922
  subacute ruminal acidosis, lipopolysaccharide, 1712
    lipopolysaccharide translocation, 1060
acute ruminal acidosis, lameness, bovine laminitis, oligofructose overload, 607
additional prostaglandin $F_{2\alpha}$, estradiol, Ovsynch, 1412
adenosine triphosphate, mitochondria, mammary, lactation, 2038
adjunct culture, Swiss cheese, infrared, chemometrics, 3575
adsorbent, aflatoxin $B_1$, aflatoxin $M_1$, lactating dairy cow, 3959
aerobic stability, corn silage, inoculant, 3907
  esterase, neutral detergent fiber digestibility, *Lactobacillus buchneri*, 732
  silage, *Lactobacillus buchneri*, molasses, 690
aflatoxin, serum parameter, dried yeast, sheep milk, 4997
aflatoxin $B_1$, aflatoxin $M_1$, lactating dairy cow, adsorbent, 3959
aflatoxin $M_1$, lactating dairy cow, adsorbent, aflatoxin $B_1$, 3959
alfalfa, near-infrared reflectance spectroscopy, neutral detergent-soluble carbohydrate, timothy, 1702
  protein, digestibility, starch, 5595
  wet corn gluten feed, by-product, dairy cattle, 3510
alfalfa diurnal cutting, bacterial protein synthesis, dairy cow, total nonstructural carbohydrate, 1092
alfalfa silage, corn silage, dietary forage level, monensin, 3211
  *Lactobacillus buchneri*, real-time quantitative PCR, 5005
alfalfa silage storage structure, rumen-protected methionine, milk yield, nitrogen efficiency, 1281
allele genotyping, biotechnology, cattle major histocompatibility complex (BoLA) class II DRB3 gene, PCR sequence-based typing, 2965
allergenicity, serology, goat and cow milk, goat and cow milk lactosera, 837
allergy, systemic anaphylaxis, immunoglobulin E, milk protein, 4738
alley floor, trimming method, claw health and conformation, locomotion, 960
alternative measures, mastitis, heritability, threshold model, 3402
alternative splicing, cryptic splice site, equine $\alpha_{S1}$-casein, phosphorylation, 3604
amino acid, dairy cow, glucose metabolism, propionic acid, 3244
  dairy cow, methionine, methionine analog, 5154
  gluconeogenesis, dairy cow, transition, 3306
  glucose, dairy cow, splanchnic, 3233
amino acid digestibility, distillers dried grains with solubles, fish meal, 6056
  modified three-step procedure, immobilized digestive enzyme assay, 3939
  rumen-undegradable protein, soybean meal, 4489
amino acid supply, dairy cow, red clover silage, nitrogen metabolism, 5620
ammonia, emissions, dairy, nitrogen, 2326
amphotericin B, lameness, pain, salicylate, 3731
amylase, enzyme, lactation, 1050
analgesia, dairy calf, hot-iron dehorning, local anesthetic, 1512
aneuploidy, chimerism, translocation, cattle, 3481
angiotensin-I-converting enzyme, rheology, exopolysaccharide, proteolysis, 895
angiotensin-I-converting enzyme inhibitory peptide, bovine κ-casein, 1885
angiotensin-converting enzyme inhibiting peptide, cheese ripening, Val-Pro-Pro, Ile-Pro-Pro, 826
animal model, female fertility, genetic evaluation, model validation, 4063
animal welfare, behavior, milk production, dairy buffalo, 907

dairy cattle, cow, calf, 4101
pasture, motivation, cow comfort, 3651
anovulation, heritability, pregnancy loss, reproduction, 5739
antibiotic combination, cefalexin, kanamycin, bovine mastitis, 6217
antibiotic dry therapy, milking type, somatic cell count, dairy flock, 156
antibiotic residue, detection limit, β-lactam, goat's milk, 3585
antibiotic resistance, risk communication, bovine veterinarian, 3494
antibody profile, milk enzyme-linked immunosorbent assay, milk production, paratuberculosis, 149
*Mycobacterium avium* ssp. *paratuberculosis*, slaughter weight, slaughter value, 4340
antigen-release device, implantation, specific immune milk, immunoglobulin G, 100
antimicrobial, mastitis, *trans*-cinnamaldehyde, 1423
non-β-lactam, goat's milk, residue screening test, 4200
susceptibility, resistance, mastitis, 2589
antimicrobial agent, herd health, dairy calf, diarrhea, 4707
antimicrobial resistance, diarrhea, colostrum, dairy calf, 286
mastitis, gram-negative bacteria, prevalence, 2020
antimicrobial susceptibility, integron, gene cassette, *Arcanobacterium* (*Actinomyces*) *pyogenes*, 3659
antioxidant, organic milk, dairy cow diet, ratio between n-6 and n-3, 2057
antioxidant, plasma, 18:3 n-3, lipoperoxidation, 6095
apoptosis, dairy cow, tight junction, proteinase, 1998
apparatus, method, urine collection, 5224
apparent efficiency of absorption, colostrum, IgG, serum protein, 4565
appetite-regulating hormone, dairy cow, rumen fill, foraging behavior, 2095
*Arcanobacterium* (*Actinomyces*) *pyogenes*, antimicrobial susceptibility, integron, gene cassette, 3659
aroma, proteolysis, packaging type, Ezine cheese, 4146
aroma active compound, headspace gas chromatography, goat cheese, 2435
aromatic starter strain, thermophilic starter, fresh cheese curd, 1856
artificial insemination, mathematical optimization, traveling salesman problem, cows, 2306
artificial insemination straw package, pregnancy outcome, meta-analysis, 4432
artificial neural network, low-fat yogurt, reduced-fat yogurt, quality control, 4797
mastitis, metabolite, pathogen, 4901
asphalt floor, claw growth, concrete floor, rubber mat, 2625
association analysis, microsatellite RM188, *Bos taurus* autosome 4, milk trait quantitative trait locus, 758
associative effect, digestion and rumen fermentation, dairy cow, pasture and grain, 2747
ATP-binding cassette transporter, cholesterol, lipid homeostasis, mammary gland, 3744
automated milk feeder, dairy calf, feeding behavior, 2843
automated milking system, milking frequency, variance component, 3422
automatic milk feeder, calf, feeding behavior, health, 4549
automatic milking, conventional milking, housing system, udder health, 3696
autoregression, target range, milk urea, test-day model, 3529
available grazing time, foraging behavior, hunger-regulated hormones and metabolites, dairy cow, 4572
Awassi sheep, udder linear measurement, milk production trait, 4613

## B

*Bacillus*, *Paenibacillus*, bacterial subtyping, fluid milk spoilage, 4833
milk, pasteurization, 4823
bacteria, methanogens, monensin, bromoethanesulfonate, 3861
bacteria quality testing, risk factor, bulk tank milk, 2634, 2644
bacterial count, milk quality, dairy, bulk milk, 4978
bacterial culture, no growth, polymerase chain reaction, mastitis, 2610
bacterial diversity, detachment procedure, solid-associated bacteria, $^{15}N$, 5659
bacterial protein synthesis, dairy cow, total nonstructural carbohydrate, alfalfa diurnal cutting, 1092
bacterial subtyping, fluid milk spoilage, *Bacillus*, *Paenibacillus*, 4833
bacteriocin, glycine, food preservation, custard cream, 2365
*Streptococcus uberis*, mastitis, strain, 5467
bacteriophage, dairy product, *Staphylococcus aureus*, biocontrol, 3019
BactoScan flow cytometry, milk preservative, goat milk, total bacterial count, 4841
barley and corn grain, periparturient cow, chromium, 5411
barley grain, dairy cow, diurnal, metabolic response, 1084
grinding, steam-rolling, lactating cow, 3299
lactic acid, dairy cow, rumen fermentation, 6023
bedding, cow comfort, tie-stall, behavior, 2684
beef quality assurance, dairy cow, survey, 1265
behavior, bedding, cow comfort, tie-stall, 2684
dairy cow, dystocia, dry matter intake, 4937
dry off, milking frequency, udder firmness, 3194
feeding, management, traffic, 1272
milk production, dairy buffalo, animal welfare, 907
rumination, acidosis, 5067
transition, competition, dry matter intake, 3116
best linear unbiased predictor, genomic selection, single nucleotide polymorphism, genetic evaluation, 4648
best prediction, genetic evaluation, persistency, 2248
milk yield, long lactation, 1796
bifidobacteria, proteomics, lactic acid bacteria, propionibacteria, 811
*Bifidobacterium*, *Lactobacillus*, exopolysaccharide, human origin, 4158
bioavailability, cattle, iron, silage, 2896
biocontrol, bacteriophage, dairy product, *Staphylococcus aureus*, 3019

bioeconomic model, economic value, dairy sheep, 2183, 2195
biofilm, puerperal cow, *Escherichia coli*, virulence factor gene, 6000
biofuel, distillers dried grains with solubles, dairy farm returns, nutrient management, 6105
glycerol, energy, 5111
biohydrogenation, concentrate, polymerase chain reaction, pH, 4456
condensed tannin, α-linolenic acid, 177
biomechanics, cattle, flooring, lameness, 972
biosecurity, infection, contagious transmission, mastitis, 4717
biotechnology, cattle major histocompatibility complex (BoLA) class II DRB3 gene, PCR sequence-based typing, allele genotyping, 2965
Bi-plate, Petrifilm, mastitis, culture, 2297
birth weight, litter size, immune passive transfer, goat kid, 1616
bite counter, feed intake, grazing behavior, halter, 996
bleach, whey protein concentrate, solid-phase microextraction, flavor, 5917
blood, rapid, pregnancy test, pregnancy-associated glycoproteins (PAG), 3819
blood immunoglobulin G, health, colostrum, heat treatment, 3265
blood metabolite, body condition, glucose infusion, lactation performance, 5645
blood parameter, rumen-protected choline, dry propylene glycol, feed intake, 2729
body composition, dairy goat, lactation, 3374
body condition, glucose infusion, lactation performance, blood metabolite, 5645
body condition score, dairy cow, lameness, digital cushion, 3175
health and welfare, reproduction, review, 5769
hyperkeratosis, somatic cell count, risk factor, 3106
somatic cell count, body weight, dairy cow, 4386
body condition scoring, reproduction, body weight, dairy cow, 4375
body weight, dairy cow, body condition score, somatic cell count, 4386
body condition scoring, reproduction, 4375
model, lactation, milk composition, 5043
bolus, ear tag, electronic identification, goat, 1500
bone, calcium, phosphorus, cow, 223, 5189
heifer, phosphorus, 1741
*Bos taurus* autosome 18, mastitis, somatic cell score, linkage disequilibrium, 4046
*Bos taurus* autosome 4, milk trait quantitative trait locus, association analysis, microsatellite RM188, 758
botulism, *Clostridium botulinum* toxin type C, milk, 2529
bovine, flow cytometry, milk, neutrophil, 626
regulated gene expression, SLC3, SLC6, and SLC7, 1124
defensin, lingual antimicrobial peptide, milk, 2691
flow cytometry, milk, neutrophil, 626
gene expression, growth hormone, mammary gland, 1889
linseed oil, liver triglyceride, 4954
mammary epithelial cell, selenomethionine, glutathione peroxidase, 2670
microarray, *Streptococcus uberis*, mastitis, 117
parentage testing, pedigree record, single nucleotide polymorphism, 369
regulated gene expression, SLC3, SLC6, and SLC7, 1124
resistant nonlinear smoothing, progesterone, luteal phase, 1460
bovine coagulase-negative staphylococci, milk, teat apex, transfer RNA-intergenic spacer polymerase chain reaction, 3204
bovine intramammary infection, real-time PCR, validation, 952
bovine laminitis, oligofructose overload, acute ruminal acidosis, lameness, 607
bovine leukocyte antigen DRB3.2*, bovine virus, humoral response, 375
bovine mammary cell, cooperation, epidermal growth factor, mesenchymal-epithelial transition factor (MET), 3667
bovine mastitis, antibiotic combination, cefalexin, kanamycin, 6217
bovine milk, fermentation characteristic, *Lactobacillus casei*, soymilk, 2468
infant formula, osteopontin, human milk, 5378
mass spectrometry, oligosaccharide, 2991
ND1 gene, polymerase chain reaction, yak milk, 1354
ovine milk, sensory properties, Halloumi cheese, 4135
bovine somatotropin, milk production, shortened dry period, 5503
n-3 fatty acid, milk fat, 4865
bovine veterinarian, antibiotic resistance, risk communication, 3494
bovine virus, humoral response, bovine leukocyte antigen DRB3.2*, 375
bovine κ-casein, angiotensin I converting enzyme inhibitory peptide, 1885
b-phase duration, pulsation, liner compression, vacuum, 913
breed, twinning, heritability, gestation length, 2259
breeding, conception rate, nonreturn rate, reproduction, 3517
breeding program, economics, deterministic approach, genomic selection, 382
selection index, genomic selection, 5292
breeding scheme simulation, dairy cattle, female fertility, selection, 4023
breeding value, computing method, dairy cattle, equivalent model, 2971
brining, structure, yield, cheese, 4169
bromoethanesulfonate, bacteria, methanogens, monensin, 3861
monensin, methane, protozoa, 3849
Brown Swiss milk, coagulation properties, mid-infrared spectroscopy, chemometrics, 423
buffer, dairy cow, sodium sesquicarbonate, 3354
buffer block, subacute ruminal acidosis, 352
bulk milk, bacterial count, milk quality, dairy, 4978
bulk milk, somatic cell count, total bacterial count, dairy goat, 4355

bulk tank milk, bacteria quality testing, risk factor, 2644
bacteria quality testing, risk factor, 2634
centrifugation, *Mycoplasma* spp., mastitis, 4444
NAHMS, methicillin-resistant *Staphylococcus aureus* (MRSA), dairy cow, 4988
somatic cell, microbiological quality, 4239
polymerase chain reaction and enzyme-linked immunosorbent assay, *Coxiella burnetii*, dairy sheep, 1581
buttermilk lipid, sphingomyelin, supercritical fluid extraction, phospholipid, 2373
butteroil, fatty acid ethyl ester, fractionation, short- and medium-chain fatty acid, 1840
by-product, dairy cattle, alfalfa, wet corn gluten feed, 3510

## C

CaCo-2, cancer, cell cycle kinetics, lactoferricin, 2477
calcium, milk, mineral, mid-infrared spectrometry, 2444
phosphorus, cow, bone, 223, 5189
transition cow, dietary cation-anion difference, potassium, 5677
calcium lactate, crystal, Cheddar cheese, 3616
calcium requirement, cellulolytic bacteria, rumen, 5079
calf, animal welfare, dairy cattle, cow, 4101
computer-controlled milk feeder, meal pattern, milk allowance, 2906
corn, processing, starter, 782
enteropathogen, diarrhea, risk factor, 5057
fat, protein, digestion, 5147
feeding behavior, health, automatic milk feeder, 4549
herd health, waste milk, 3503
milk clotting, oral rehydration solution, strong ion difference, 1649
milk replacer, protein, energy, 3281
mortality, dairy, risk factor, 2782
respiratory disease, virus, risk factor, 5139
starter, fatty acid, 670
stillbirth, weight, dairy, 2580
yeast, mannanoligosaccharide, cottonseed hull, 790
calf diarrhea, oral electrolyte solution, strong-ion difference, rehydration, 296
calf disease, monitoring, validation, 1660
calf nutrition, milk replacer, growth, lactation performance, 799
calf physiology, preruminant calf, cold stress, neonatal immunity, 6134
calf rearing, replacement cost, mastitis cost, clinical mastitis, 3274
calf survival, coefficient of variation, 2166
calf vigor, colostrum intake, hours of age, heat supply, 3915
calving ease, genetic parameter, maternal genetic effect, direct-maternal genetic correlation, 2229
calving trait, genomic selection, single nucleotide polymorphism, quantitative trait loci, 2931
camel milk, flavored yogurt, sensory quality, acceptability, 857
cancer, cell cycle kinetics, lactoferricin, CaCo-2, 2477
candidate gene, survival rate, fertilization rate, candidate pathway, 2238
candidate pathway, candidate gene, survival rate, fertilization rate, 2238
canola meal, distillers grain with solubles, lactating dairy cow, 5669
canola seed, sunflower seed, methane, flaxseed, 2118
capillary electrophoresis, ultra-high pressure homogenization, proteolysis, yogurt, 71
case definition, meta-analysis, dairy cow, sample size, 3545
α-casein, ferritin, immunoassay, milk, 3810
$\alpha_{S1}$-casein, κ-casein, milk composition, goat, 2960
γ-casein, river buffalo milk, frozen milk, curd, 1319
κ-casein, milk composition, goat, $\alpha_{S1}$-casein, 2960
casein, dairy cow, glucose metabolism, propionic acid, 6068
casein haplotype, dairy cow, milk protein composition, protein variant, 1192
genetic polymorphism, goat, 6197
casein micelle, dynamic light scattering, particle size, particle size distribution, 1829
scanning electron microscopy, microstructure, rehydration, powder
whey protein, mineral, microfiltration, 5357
casein molecular model, protein functionality, value-added milk product, casein structure, 1338
casein structure, casein molecular model, protein functionality, value-added milk product, 1338
casein supramolecule, acid gelation, milk coagulation, 5854
caseinolysis, *Escherichia coli* P4, extracellular bacterial protease, mastitis, 1398
Caspian Sea yogurt, lactobionic acid, *Acetobacter orientalis*, 25
catfish oil, fat, digestibility, 5178
cattle, aneuploidy, chimerism, translocation, 3481
flooring, lameness, biomechanics, 972
genetic polymorphism, milk protein, 5335
G protein-coupled receptors GPR41 and GPR43, volatile fatty acids, 2696
immune function, phosphorus, 365
iron, silage, bioavailability, 2896
lameness, tie-stall, welfare, 1567
milk, selenium, meta-analysis, 324
quantitative trait locus, female fertility, milk production trait, 5712
cattle major histocompatibility complex (BoLA) class II DRB3 gene, PCR sequence-based typing, allele genotyping, biotechnology, 2965
causal effect, health, fertility, recursive model, 1778
cefalexin, kanamycin, bovine mastitis, antibiotic combination, 6217
ceftiofur hydrochloride, dairy cow, endometritis, reproduction, 1532
cell cycle kinetics, lactoferricin, CaCo-2, cancer, 2477
cellulolytic bacteria, rumen, calcium requirement, 5079
central composite design, randomized incomplete block design, mixed model, factorial experiment, 4581

centrifugation, *Mycoplasma* spp., mastitis, bulk tank milk, 4444
cephalosporin, clinical mastitis, treatment, risk factor, 1941
cephapirin, pharmacokinetics, milking frequency, 4262
cereal supplement, conjugated linoleic acid, pasture, sheep, 3964
cesium-137, strontium-90, cheese, milk, 5363
Cheddar cheese, calcium lactate, crystal, 3616
  crosslinked β-cyclodextrin, cholesterol removal, accelerated ripening, 49
  flavor quality, infrared spectroscopy, 87
cheese, brining, structure, yield, 4169
  ewe, extruded linseed, n-3 fatty acid, 4122
  manufacturing, screening, high throughput, 5868
  milk, cesium-137, strontium-90, 5363
  texture, rheology, low fat, 4756
cheese odor compound, supplemented diet, α-tocopherol, linseed, 3040
cheese ripening, citrus fruit, dairy ewe, milk coagulation, 469
  Val-Pro-Pro, Ile-Pro-Pro, angiotensin-converting enzyme-inhibiting peptide, 826
cheese sensory quality, once-daily milking, milk composition, cheese yield, 4730
cheese whey, goat, farm, factory, 4792
cheese yield, cheese sensory quality, once-daily milking, milk composition, 4730
chemometrics, adjunct culture, Swiss cheese, infrared, 3575
  Brown Swiss milk, coagulation properties, mid-infrared spectroscopy, 423
chemoprevention, exopolysaccharide, fermented milk, rheology, 847
chewing, ruminal pH, acidosis, physically effective fiber, 1603
Chile, dairy, fertility, somatic cell, 1575
chimerism, translocation, cattle, aneuploidy, 3481
Chinese Holstein, genetic parameter, random regression model, 4697
chitotriosidase, complement system, goat kid, immunoglobulin G, 1696
*Chlamydophila* spp., dairy farm, prevalence, risk factor, 4347
cholescystokinin/gastrin family peptides and insulin-like growth factor-I, heat shock protein, sodium-butyrate and flavomycin as growth promoters, maturation of gastrointestinal tract, 1038
cholesterol, lipid homeostasis, mammary gland, ATP-binding cassette transporter, 3744
cholesterol removal, accelerated ripening, Cheddar cheese, crosslinked β-cyclodextrin, 49
  whole pasteurized milk, β-cyclodextrin, 863
cholesterol-reduced yogurt, nanopowdered chitosan, crosslinked β-cyclodextrin, shelf life, 5907
chromium, barley and corn grain, periparturient cow, 5411
*cis*-9 *trans*-11 conjugated linoleic acid, fish oil, micro-algae, milk composition, 6156
citrus fruit, dairy ewe, milk coagulation, cheese ripening, 469
claw characteristic, Holstein-Friesian, Norwegian, lameness, 2174
claw growth, concrete floor, rubber mat, asphalt floor, 2625
claw health, leg health, locomotion, genetic correlation, 1770
claw health and conformation, locomotion, alley floor, trimming method, 960
claw lesion, lameness, risk factor, 3165
clinical endometritis, diagnostic method, speculum, Metricheck, 5429
clinical mastitis, calf rearing, replacement cost, mastitis cost, 3274
  diagnosis, pathogen, dairy, 2598
  genetic parameter, predicted cost, model comparison, 3472
  risk factor, hyperkeratosis, udder hygiene score, 2551
  therapy, nonsteroidal antiinflammatory drug, 4421
  treatment, risk factor, cephalosporin, 1941
*Clostridium botulinum* toxin type C, milk, botulism, 2529
coagulase-negative staphylococci, epidemiology, dairy cow, subclinical mastitis, 4962
coagulation properties, mid-infrared spectroscopy, chemometrics, Brown Swiss milk, 423
coconut oil, protozoa, lauric acid, myristic acid, 5561
coefficient of variation, calf survival, 2166
cold stress, neonatal immunity, calf physiology, preruminant calf, 6134
colitis, intestinal barrier, myosin light-chain kinase, *Lactobacillus rhamnosus*, 2400
colostrum, colostrum replacer, passive transfer, immunoglobulin, 1750
  dairy calf, antimicrobial resistance, diarrhea, 286
  heat treatment, blood immunoglobulin G, health, 3265
  IgG, serum protein, apparent efficiency of absorption, 4565
  lipocalin, odorant-binding protein, pheromone transport, 4992
  nipple bottle, esophageal tube feeder, passive transfer, 1758
colostrum intake, hours of age, heat supply, calf vigor, 3915
colostrum replacer, passive transfer, immunoglobulin, colostrum, 1750
commercial wheat silage, digestibility, regression analysis, 638
competition, dry matter intake, behavior, transition, 3116
  feeding behavior, dairy heifer, 3922
complement system, goat kid, immunoglobulin G, chitotriosidase, 1696
component feeding, TMR, sorting, heifer, 1161
computer-controlled milk feeder, meal pattern, milk allowance, calf, 2906
computing method, dairy cattle, equivalent model, breeding value, 2971
concentrate, polymerase chain reaction, pH, biohydrogenation, 4456
concentrate supplementation, continuous culture fermentation, digestion, highly digestible pasture, 189
  grazing dairy cow, milk fat composition, strain, 247

intravenous glucose tolerance test, insulin resistance, Holstein-Friesian strain, 216
conception, reproduction, energy balance, progesterone, 2737
conception rate, fertility, trend, heat stress, 4641
heritability, random regression, threshold model, 2922
nonreturn rate, reproduction, breeding, 3517
concrete floor, rubber mat, asphalt floor, claw growth, 2625
condensed tannin, α-linolenic acid, biohydrogenation, 177
congenital, dairy cow, insulin sensitivity, neonatal calf, 4404
conjugated linoleic acid, fatty acid transporters, lactation, mammary gland, 1169
grazing, rumenic acid, vaccenic acid, 3874
lactation, milk fat, trans fatty acid, 4317
linolenic acid, herbage mass, daily herbage allowance, 5212
lipid metabolism, stearoyl-coenzyme A desaturase, 5167
milk fat, full-fat corn germ, 3386
milk fat depression, semi-hard goat cheese, 2534
pasture, sheep, cereal supplement, 3964
rennet paste, probiotic, Pecorino cheese, 1330
reproduction, fatty acid, survival analysis, 2662
stearoyl-CoA desaturase enzyme, genetic parameter, milk fatty acids, 392
variation factor, dairy ewe, fatty acid, 3791
contact current, dairy cow, stray voltage, meta-analysis, 5951
contagious transmission, mastitis, biosecurity, infection, 4717
contaminated feedstuff, *Fusarium* mycotoxin, deoxynivalenol, dairy cow, 1585
continuous culture, ionophore, soybean oil, rumen microbial diversity, 4467
continuous culture fermentation, digestion, highly digestible pasture, concentrate supplementation, 189
continuous freezer, response surface methodology, ice cream, hardness, 5834
conventional milking, housing system, udder health, automatic milking, 3696
cooperation, epidermal growth factor, mesenchymal-epithelial transition factor (MET), bovine mammary cell, 3667
coproduct, dairy, milk production, ruminal fermentation, 5120
corn, digestibility, lactating cow, starch, 4541
processing, starter, calf, 782
corn germ, distillers grain, milk fat, cow, 5523
fat, fatty acid, cow, 1023
corn gluten meal, melamine, feed, milk, 2046
corn milling (co)product, high-protein distillers grains, milk production, 2911
corn silage, dietary forage level, monensin, alfalfa silage, 3211
inoculant, aerobic stability, 3907
steam-flaked corn, ground corn, ryegrass silage, 1117
coronary region, growth factor, dermis, keratinocyte, 1913
correlation, metabolites, hormones, heritability, 4001
cottage cheese, preference mapping, qualitative multivariate analysis, home usage test, 5883
cottonseed hull, calf, yeast, mannanoligosaccharide, 790
covariance function, genetic parameter, parametric correlation structure, 4634
cow, bone, calcium, phosphorus, 223, 5189
calf, animal welfare, dairy cattle, 4101
corn germ, distillers grain, milk fat, 5523
fat, fatty acid, 1023
fiber digestion, red clover silage, grass silage, 5634
liver, transition period, gene expression, 1924
mortality, necropsy, dairy, 1954
cow comfort, animal welfare, pasture, motivation, 3651
free-stall design, open pack, dairy cattle, 5497
lameness, udder cleanliness, stall design, 3074
standing behavior, stall maintenance, dairy cattle, 1979
tie-stall, behavior, bedding, 2684
cow comfort index, dairy cow, lying behavior, 4412
cows, artificial insemination, mathematical optimization, traveling salesman problem, 2306
*Coxiella burnetii*, dairy sheep, bulk-tank milk, polymerase chain reaction and enzyme-linked immunosorbent assay, 1581
C-reactive protein, dairy cow, milk fat depression, rumen lipopolysaccharide, 3800
criterion, restricted index, total milk yield, total lactation persistency, 2915
crossbreeding, dystocia, stillborn, 6167
Holstein-Friesian, Jersey, multibreed model, 1240
hybrid vigor, Jersey, feed efficiency, 6176
immune response, Norwegian Red, 518
udder health, 749
cross-linked β-cyclodextrin, cholesterol removal, accelerated ripening, Cheddar cheese, 49
shelf life, cholesterol-reduced yogurt, nanopowdered chitosan, 5907
crude protein, mounting behavior, estrous detection, estrous behavior, 1013
cryptic splice site, equine $\alpha_{S1}$-casein, phosphorylation, alternative splicing, 3604
cryptosporidiosis, diarrhea, dairy calf, nitazoxanide, 1643
crystal, Cheddar cheese, calcium lactate, 3616
culling, selection, mastitis, 2224
survival analysis, foot lesion, 2572
culture, Bi-plate, Petrifilm, mastitis, 2297
culture, Tri-plate, Petrifilm Staph Express, mastitis, 5326
curd, γ-casein, river buffalo milk, frozen milk, 1319
curd pH, milk acidification, Mozzarella, 4211
curd-syneresis sensor, validation, whey yield, whey fat, 5386
custard cream, bacteriocin, glycine, food preservation, 2365
CXCR1, somatic cell score, dairy cow, 4018
β-cyclodextrin, cholesterol removal, whole pasteurized milk, 863
cytokine, gene, lipopolysaccharide, neutrophil, 3185
growth factor, sole ulceration, 5977

## D

daily herbage allowance, conjugated linoleic acid, linolenic acid, herbage mass, 5212

dairy, bulk milk, bacterial count, milk quality, 4978
calf, stillbirth, weight, 2580
clinical mastitis, diagnosis, pathogen, 2598
cow, mortality, necropsy, 1954
fertility, somatic cell, Chile, 1575
*Lactobacillus acidophilus*, probiotic, microarray analysis, 870
milk production, ruminal fermentation, coproduct, 5120
nitrogen, ammonia, emissions, 2326
risk factor, calf, mortality, 2782
dairy aerosolized dust, particulate size, disease potential, 6033
dairy buffalo, animal welfare, behavior, milk production, 907
dairy calf, antimicrobial resistance, diarrhea, colostrum, 286
diarrhea, antimicrobial agent, herd health, 4707
failure of passive transfer of immunity, risk factor, immunoglobulin G, 3973
feeding behavior, automated milk feeder, 2843
health status, rumen development, weaning, 645
hot-iron dehorning, local anesthetic, analgesia, 1512
nitazoxanide, cryptosporidiosis, diarrhea, 1643
dairy cattle, alfalfa, wet corn gluten feed, by-product, 3510
cow, calf, animal welfare, 4101
cow comfort, free-stall design, open pack, 5497
standing behavior, stall maintenance, 1979
distillers grains, 5802
dry period, heat stress, gene expression, 5988
meta-analysis, mastitis, 3134
equivalent model, breeding value, computing method, 2971
fatty acid, milk composition, lactation stage, 1469
female fertility, selection, breeding scheme simulation, 4023
fertility, days open, heat stress, 4689
genome-wide scan, quantitative trait locus, fatty acid, 4664
genotype by environment interaction, female fertility, 3437
lameness, limb movement variable, spline transformation, 2539
management, dry period, mastitis, 3150
metabolite, mastitis, 5419
milk fat composition, DGAT1, SCD1, 5720
Poisson, model comparison, mastitis, 739
quantitative trait locus, mastitis, mammary epithelial cell, 4621
rectal temperature, heat stress, temperature-humidity index, 109
shade, sprinkler, environment, 506
skin lesion, freestall, welfare, 5487
subclinical ketosis, feeding behavior, dry matter intake, 4971
variance components model, quantitative trait locus mapping, inbreeding, 765
dairy cow, available grazing time, foraging behavior, hunger-regulated hormones and metabolites, 4572
body condition score, somatic cell count, body weight, 4386
body condition scoring, reproduction, body weight, 4375
bulk tank milk, NAHMS, methicillin-resistant *Staphylococcus aureus* (MRSA), 4988
contaminated feedstuff, *Fusarium* mycotoxin, deoxynivalenol, 1585
CXCR1, somatic cell score, 4018
diacylglycerol acyltransferase 1, fatty acid, quantitative trait locus, 4676
dietary fatty acid, feed restriction, reproduction, 2562
digestibility, fermentation, wheat, 3825
diurnal, metabolic response, barley grain, 1084
DL-malic acid, methane, intake, 3258
dystocia, dry matter intake, behavior, 4937
embryo quality, fatty acid, reproduction, 1520
endometritis, reproduction, ceftiofur hydrochloride, 1532
energy balance, mastitis, immunity, 4301
exercise, physical fitness, pregnancy, 548
extended lactation, pasture and grain diet, total mixed ration, 1479
fat feeding, protein composition, β-lactoglobulin phenotype, 197
feed intake, physical activity, indirect calorimetry, 2804
folic acid, vitamin $B_{12}$, methionine and glucose kinetics, 677
rumen-protected methionine, 1685
gene–gene interaction, survival rate, fertility, 6186
glucagon, milk protein composition, milk amino acid composition, 130
glucose, metabolism, transition, 1071
glucose metabolism, propionic acid, amino acid, 3244
casein, 6068
grass silage, digestibility, diet composition, 5019
feed intake, 5031
grazing, herbage mass, pasture allowance, 414
milk fatty acid, vegetable oil, 4530
hyperketonemia, disease, milk production, 571
immune function, floor surface, locomotion, 4249
innate immunity, mastitis, acute phase protein, 980
insulin sensitivity, neonatal calf, congenital, 4404
iodine, milk, rapeseed meal, 4514
lactation curve, water intake, dry matter intake, 4072
lameness, digital cushion, body condition score, 3175
linseed oil, linseed, milk fatty acid, 5199
lipid metabolism, dry period, rumen-protected fat, 1670
lipopolysaccharide, lingual antimicrobial peptide, milk, 6046
liver fat content, dry matter intake, glucose metabolism, 1554
luteal activity, genetic merit, fertility, 2159
lying behavior, cow comfort index, 4412
manure ammonia, forage, protein, 5607
methionine, methionine analog, amino acid, 5154
milk fat, milk composition, monensin, 777
milk fat depression, rumen lipopolysaccharide, C-reactive protein, 3800
milk mineral, heritability, nongenetic variation, 5754

milk protein, methionine, 4448
milk protein composition, protein variant, casein haplotype, 1192
milk yield, subacute ruminal acidosis, acarbose, 4481
monensin, acute acidosis, acarbose, 2758
mortality, season, temperature-humidity index, 3781
*Mycobacterium paratuberculosis* shedding, milk production, income over feed cost, 4929
neutrophil, vitamin E, stereoisomer, 720
nutrient partitioning, growth hormone receptor, insulin-like growth factor 1, 2706
pasture and grain, associative effect, digestion and rumen fermentation, 2747
phosphodiesterase, mammary gland, 3757
plant extract, milk fatty acid, 3392
polyunsaturated fatty acid, high ambient temperature, immune function, 2796
potassium, dietary cation-anion difference, acid–base status, 6123
progesterone, reproduction, timed artificial insemination, 5436
progesterone profile, fertility, pregnancy, 4919
progesterone receptor, fertility, polymorphism, 4082
red clover silage, nitrogen metabolism, amino acid supply, 5620
risk factor, generalized estimating equation, lameness, 5476
rumen, folic acid, 6116
rumen fermentation, barley grain, lactic acid, 6023
rumen fill, foraging behavior, appetite-regulating hormone, 2095
sample size, case definition, meta-analysis, 3545
sodium sesquicarbonate, buffer, 3354
somatic cell count, organic farming, 3775
subclinical mastitis, production loss, 3124
sorting, dry matter content, 3292
splanchnic, amino acid, glucose, 3233
stray voltage, meta-analysis, contact current, 5951
subclinical endometritis, prostaglandin treatment, 4906
subclinical mastitis, coagulase-negative staphylococci, epidemiology, 4962
survey, beef quality assurance, 1265
tight junction, proteinase, apoptosis, 1998
time at pasture, grazing behavior, pasture intake, 3331
timed artificial insemination, natural service, reproductive performance, 5456
total nonstructural carbohydrate, alfalfa diurnal cutting, bacterial protein synthesis, 1092
transition, amino acid, gluconeogenesis, 3306
validation, rumination, feeding behavior, 6052
vitamin $B_{12}$, ruminal synthesis, intestinal absorption, 4524
weight distribution, lameness, welfare, 581
zinc, milk production, somatic cell count, 2128
dairy cow diet, ratio between n-6 and n-3, antioxidant, organic milk, 2057
dairy demand, elasticity, ice cream, Nielsen home scan retail data, 6210
dairy dessert, flow behavior, sensory analysis, inulin, 4188
dairy emulsion, whipping, triglyceride, ice cream pasteurization, 3566
dairy ewe, fatty acid, conjugated linoleic acid, variation factor, 3791
milk coagulation, cheese ripening, citrus fruit, 469
dairy farm, herd-level risk factor, multidrug-resistant *Salmonella*, 4229
incidence rate, introduction, multidrug-resistant *Salmonella*, 4218
nitrogen, phosphorus, 204
prevalence, risk factor, *Chlamydophila* spp., 4347
dairy farm returns, nutrient management, biofuel, distillers dried grains with solubles, 6105
dairy flock, antibiotic dry therapy, milking type, somatic cell count, 156
dairy goat, bulk milk, somatic cell count, total bacterial count, 4355
lactation, body composition, 3374
milk, iodine, 5133
off-feed, acidosis, modeling, 3894
udder cisternal size, once-daily milking, milk quality, 5447
dairy heifer, competition, feeding behavior, 3922
forage:concentrate, N balance, limit feeding, 2078
nutrition, leptin, puberty, 1430
dairy herd, incidence, salmonellosis, 3766
longitudinal study, epidemiology and food safety, infection dynamics, 1811
dairy product, *Staphylococcus aureus*, biocontrol, bacteriophage, 3019
dairy sheep, bioeconomic model, economic value, 2183, 2195
bulk-tank milk, polymerase chain reaction and enzyme-linked immunosorbent assay, *Coxiella burnetii*, 1581
genetic improvement, gene-assisted selection, 5814
mammary tight junction, milking omission, milking frequency, 3684
mastitis, somatic cell count, divergent selection, 1203
protein degradability, 4507
somatic cell count, longevity, survival analysis, 6160
date fiber, sensory quality, acceptability, yogurt, 5403
daughter performance, interim evaluation, progeny test, 2348
days open, days pregnant, stage of pregnancy, test-day model, 1300
test-day model, pregnancy status, 2947
heat stress, dairy cattle, fertility, 4689
days pregnant, stage of pregnancy, test-day model, days open, 1300
test-day model, pregnancy status, days open, 2947
deamidation, phosphorylation, two-dimensional cartography, equine β-casein, 2389
decision support, stochastic dominance, reproductive management, 1290
defensin, lingual antimicrobial peptide, milk, bovine, 2691
dehorning, disbudding, meloxicam, pain, 540

dense single nucleotide polymorphism marker genotyping, gene by environment interaction, genome scan, selection for robustness, 4008
deoxynivalenol, dairy cow, contaminated feedstuff, *Fusarium* mycotoxin, 1585
deoxyribonucleic acid array, mastitis, foodborne pathogen, ligase detection reaction, 3027
deoxyribonucleic acid detection, feed, milk, traceability, 5583
dermis, keratinocyte, coronary region, growth factor, 1913
desaturase index, fatty acid composition, Jersey, stearoyl-CoA desaturase 1, 1220
design, maternity, milking, freestall barn, 2276
detachment procedure, solid-associated bacteria, $^{15}N$, bacterial diversity, 5659
detection limit, β-lactam, goat's milk, antibiotic residue, 3585
deterministic approach, genomic selection, breeding program, economics, 382
DGAT1, polymerase chain reaction-restriction fragment length polymorphism, tetra-primer amplification refractory mutation system-polymerase chain reaction, marker-assisted selection, 773
  SCD1, dairy cattle, milk fat composition, 5720
diacylglycerol acyltransferase 1, fatty acid, quantitative trait locus, dairy cow, 4676
diagnosis, pathogen, dairy, clinical mastitis, 2598
diagnostic method, speculum, Metricheck, clinical endometritis, 5429
diagnostic test, whole blood, subclinical ketosis, β-hydroxybutyrate, 2618
diagnostics, subtyping, mastitic, *Staphylococcus aureus*, 1442
diarrhea, antimicrobial agent, herd health, dairy calf, 4707
  colostrum, dairy calf, antimicrobial resistance, 286
  dairy calf, nitazoxanide, cryptosporidiosis, 1643
  risk factor, calf, enteropathogen, 5057
diatomaceous earth, supercritical fluid extraction, milk fat globule membrane, milk phospholipid, 5933
diet composition, dairy cow, grass silage, digestibility, 5019
diet fermentability, rumination, high-moisture corn, 160
dietary cation-anion difference, lactation, sodium, potassium, 2711
  potassium, calcium, transition cow, 5677
  silage, mineral absorption, nonlactating cow, 2067
  timothy hay, hypocalcemia, EDTA challenge, 238
  acid–base status, dairy cow, potassium, 6123
dietary crude protein, milk yield, nitrogen efficiency, rumen-protected methionine, 2719
dietary fatty acid, feed restriction, reproduction, dairy cow, 2562
dietary fiber, milk fat depression, polyunsaturated fatty acid, ruminal pH, 1108
dietary forage level, monensin, alfalfa silage, corn silage, 3211
dietary protein, digestion and absorption, muscle protein synthesis, milk synthesis, 4812
  milk production, dry matter intake, energy balance, 1001
*Dietzia*, inflammatory bowel disease, Johne's disease, probiotic, 4846
differentiation, whey protein, insulin-like growth factor-I, osteoblast, 3014
digestibility, catfish oil, fat, 5178
  diet composition, dairy cow, grass silage, 5019
  dry matter loss, hay, spontaneous heating, 2853
  feed composition, fermentation, Monte Carlo simulation, 401
  feed intake, dairy cow, grass silage, 5031
  fermentation, wheat, dairy cow, 3825
  forage-to-concentrate ratio, yeast culture, first lactation, 5100
  lactating cow, starch, corn, 4541
  regression analysis, commercial wheat silage, 638
  starch, alfalfa, protein, 5595
digestion, calf, fat, protein, 5147
  highly digestible pasture, concentrate supplementation, continuous culture fermentation, 189
digestion and absorption, muscle protein synthesis, milk synthesis, dietary protein, 4812
digestion and rumen fermentation, dairy cow, pasture and grain, associative effect, 2747
digital cushion, body condition score, dairy cow, lameness, 3175
digital dermatitis, multilevel model, sole ulcer, white line disease, 1971
dilution rate, retention time, Rusitec, microbial growth, 3930
direct-maternal genetic correlation, calving ease, genetic parameter, maternal genetic effect, 2229
disappearance kinetics, fiber composition, hay, neutral detergent fiber, 2875
disbudding, meloxicam, pain, dehorning, 540
disease, genetic correlation, phenotypic correlation, persistency, 1785
  milk production, dairy cow, hyperketonemia, 571
disease potential, dairy aerosolized dust, particulate size, 6033
dissolved oxygen, fermentation, yogurt manufacture, set yogurt, 4112
distillers dried grains with solubles, dairy farm returns, nutrient management, biofuel, 6105
  fish meal, amino acid digestibility, 6056
distillers grain, milk fat, cow, corn germ, 5523
distillers grain with solubles, lactating dairy cow, canola meal, 5669
distillers grains, dairy cattle, 5802
distribution, mastitis, somatic cell count, 1253
diurnal, metabolic response, barley grain, dairy cow, 1084
divergent selection, dairy sheep, mastitis, somatic cell count, 1203
docosahexaenoic acid, eicosapentaenoic acid, reduced-fat Cheddar cheese, n-3 fatty acid, 1876
dried dairy ingredient, whole milk powder, flavor, storage, 2409
dried yeast, sheep milk, aflatoxin, serum parameter, 4997
drinking water, transition period, glycerol, soybean oil, 698

dromedary, lactation, milk secretion, tight junction, 1452
dry cow treatment, heifer, mastitis, prepartum, 4395
dry matter and neutral detergent fiber digestibility, eating behavior, rumination, early-lactating cow, 3364
dry matter content, dairy cow, sorting, 3292
dry matter intake, behavior, dairy cow, dystocia, 4937
behavior, transition, competition, 3116
dairy cattle, subclinical ketosis, feeding behavior, 4971
dairy cow, lactation curve, water intake, 4072
energy balance, dietary protein, milk production, 1001
glucose metabolism, dairy cow, liver fat content, 1554
milk, polyunsaturated fatty acid, milk fat, 2051
dry matter loss, hay, spontaneous heating, digestibility, 2853
dry off, milking frequency, udder firmness, behavior, 3194
dry period, estrogen, plasma lactose, 3815
feeding level, energy balance, resumption of cyclicity, 6011
heat stress, gene expression, dairy cattle, 5988
mastitis, dairy cattle, management, 3150
meta-analysis, mastitis, dairy cattle, 3134
rumen-protected fat, dairy cow, lipid metabolism, 1670
dry period length, reproduction, first postpartum ovulation, 3081
dry propylene glycol, feed intake, blood parameter, rumen-protected choline, 2729
Dutch Holstein-Friesian, protein composition, heritability, genetic correlation, 1182
dynamic light scattering, particle size, particle size distribution, casein micelle, 1829
dystocia, dry matter intake, behavior, dairy cow, 4937
stillborn, crossbreeding, 6167

## E

ear tag, electronic identification, goat, bolus, 1500
early lactation, heifer, milk, neutrophil apoptosis, 4330
early-lactating cow, dry matter and neutral detergent fiber digestibility, eating behavior, rumination, 3364
eating behavior, rumination, early-lactating cow, dry matter and neutral detergent fiber digestibility, 3364
economic value, dairy sheep, bioeconomic model, 2183, 2195
economics, deterministic approach, genomic selection, breeding program, 382
EDTA challenge, dietary cation-anion difference, timothy hay, hypocalcemia, 238
efficiency analysis, Reunion Island, milk production, 3676
eicosapentaenoic acid, reduced-fat Cheddar cheese, n-3 fatty acid, docosahexaenoic acid, 1876
18:3 n-3, lipoperoxidation, antioxidant, plasma, 6095
elasticity, ice cream, Nielsen home scan retail data, dairy demand, 6210
electrical conductivity, health monitoring, milk yield, statistical process control, 5964
electrical resistance, neural network, mastitis, somatic cell count, 1493
electronic identification, goat, bolus, ear tag, 1500
elite dairy cow, milk composition, milk processability, milk yield, 4589
embryo, heat stress, thermolability, oocyte, 563
embryo quality, fatty acid, reproduction, dairy cow, 1520
emissions, dairy, nitrogen, ammonia, 2326
emulsion, whey glycoprotein, lactosylation, Maillard reaction at low pH, 35
endogenous enzyme, proteolysis, milk coagulation properties, leukocyte differential count, 79
endometritis, homeopathic prophylaxis, reproductive performance, 4945
reproduction, ceftiofur hydrochloride, dairy cow, 1532
endometrium, fatty acid, Holstein-Friesian strain, pregnancy, 3723
energy, biofuel, glycerol, 5111
calf, milk replacer, protein, 3281
energy balance, dietary protein, milk production, dry matter intake, 1001
mastitis, immunity, dairy cow, 4301
progesterone, conception, reproduction, 2737
resumption of cyclicity, dry period, feeding level, 6011
energy intake, forage, fiber, supplemental fat, 6144
enterocin AS-48, nisin, milk, high-intensity pulsed-electric field, 2514
*Enterococcus faecium*, intramammary challenge, infection, 3158
enteropathogen, diarrhea, risk factor, calf, 5057
entrapment, kefir grains, kefir, 3002
enumeration method, Petrifilm, milk, mesophilic aerobe, 3069
environment, dairy cattle, shade, sprinkler, 506
environmental sampling, *Mycobacterium avium* ssp. *paratuberculosis*, quantitative real-time PCR, reliability, 3634
environmental sensitivity, genotype by environment interaction, genetic correlation, herd management level, 4604
enzyme, lactation, amylase, 1050
epidemiology, dairy cow, subclinical mastitis, coagulase-negative staphylococci, 4962
epidemiology and food safety, infection dynamics, dairy herd, longitudinal study, 1811
epidermal growth factor, mesenchymal-epithelial transition factor (MET), bovine mammary cell, cooperation, 3667
equine $\alpha_{S1}$-casein, phosphorylation, alternative splicing, cryptic splice site, 3604
equine β-casein, deamidation, phosphorylation, two-dimensional cartography, 2389
equivalent model, breeding value, computing method, dairy cattle, 2971
*Escherichia coli*, virulence factor gene, biofilm, puerperal cow, 6000
*Escherichia coli* P4, extracellular bacterial protease, mastitis, caseinolysis, 1398
esophageal tube feeder, passive transfer, colostrum, nipple bottle, 1758
essential oil, intake, lactating cow, periparturient cow, 1734
esterase, neutral detergent fiber digestibility, *Lactobacillus buchneri*, aerobic stability, 732
estradiol, Ovsynch, additional prostaglandin $F_{2\alpha}$, 1412
estrogen, plasma lactose, dry period, 3815

estrous behavior, crude protein, mounting behavior, estrous detection, 1013
estrous detection, estrous behavior, crude protein, mounting behavior, 1013
estrus, fertility, activity meter, heritability, 4683
evaluation accuracy, genomic selection, genomic prediction, reliability, 16
ewe, extruded linseed, n-3 fatty acid, cheese, 4122
exercise, physical fitness, pregnancy, dairy cow, 548
exopolysaccharide, fermented milk, rheology, chemoprevention, 847
  gastritis, preventive effect, lactic acid bacteria, 2423
  human origin, *Bifidobacterium*, *Lactobacillus*, 4158
  proteolysis, angiotensin-I-converting-enzyme, rheology, 895
  yogurt, *Streptococcus thermophilus*, 477
experimental design, experimental unit, scope of inference, 1
experimental model, lactoferrin, microbial infection, neonatal calf, 5534
experimental unit, scope of inference, experimental design, 1
extended lactation, pasture, hormone, metabolite, 3704
  pasture and grain diet, total mixed ration, dairy cow, 1479
extracellular bacterial protease, mastitis, caseinolysis, *Escherichia coli* P4, 1398
extruded linseed, n-3 fatty acid, cheese, ewe, 4122
Ezine cheese, aroma, proteolysis, packaging type, 4146

## F

factorial experiment, central composite design, randomized incomplete block design, mixed model, 4581
factory, cheese whey, goat, farm, 4792
failure of passive transfer of immunity, risk factor, immunoglobulin G, dairy calf, 3973
farm, factory, cheese whey, goat, 4792
fat, digestibility, catfish oil, 5178
  fatty acid, cow, corn germ, 1023
  *Listeria monocytogenes*, ultra-high-pressure homogenization, 5396
  protein, digestion, calf, 5147
    milk recording, sampling, 4914
fat feeding, protein composition, β-lactoglobulin phenotype, dairy cow, 197
fatty acid, calf, starter, 670
  conjugated linoleic acid, variation factor, dairy ewe, 3791
  cow, corn germ, fat, 1023
  dairy cattle, genome-wide scan, quantitative trait locus, 4664
  gene expression, Madin-Darby bovine kidney cell, peroxisome proliferator-activated receptor, 2027
  Holstein-Friesian strain, pregnancy, endometrium, 3723
  mid-infrared, quality, milk, 6202
  milk composition, lactation stage, dairy cattle, 1469
  protein, seasonal variation, milk composition, 4745
  quantitative trait locus, dairy cow, diacylglycerol acyltransferase 1, 4676
  reproduction, dairy cow, embryo quality, 1520
  survival analysis, conjugated linoleic acid, reproduction, 2662
fatty acid composition, infrared milk analysis, 2502
  interference filter, infrared, 2485
  Jersey, stearoyl-CoA desaturase 1, desaturase index, 1220
fatty acid ethyl ester, fractionation, short- and medium-chain fatty acid, butteroil, 1840
fatty acid transporters, lactation, mammary gland, conjugated linoleic acid, 1169
fatty liver, hepatic lipidosis, hypophosphatemia, hepatocyte, 2106
feces, urine, forage tannins, manure chemistry, 1765
feed, milk, corn gluten meal, melamine, 2046
  traceability, deoxyribonucleic acid detection, 5583
feed composition, fermentation, Monte Carlo simulation, digestibility, 401
feed efficiency, crossbreeding, hybrid vigor, Jersey, 6176
  hot season, live yeast, 343
feed intake, blood parameter, rumen-protected choline, dry propylene glycol, 2729
  dairy cow, grass silage, digestibility, 5031
  grazing behavior, halter, bite counter, 996
  physical activity, indirect calorimetry, dairy cow, 2804
feed restriction, reproduction, dairy cow, dietary fatty acid, 2562
feed system, reproductive performance, Holstein-Friesian dairy cow, genotype, 5258
feeding, management, traffic, behavior, 1272
feeding behavior, automated milk feeder, dairy calf, 2843
  dairy cow, validation, rumination, 6052
  dairy heifer, competition, 3922
  dry matter intake, dairy cattle, subclinical ketosis, 4971
  health, automatic milk feeder, calf, 4549
feeding level, energy balance, resumption of cyclicity, dry period, 6011
female fertility, dairy cattle, genotype by environment interaction, 3437
  genetic evaluation, genetic parameter, model comparison, 1229
    model validation, animal model, 4063
  milk production trait, cattle, quantitative trait locus, 5712
  quantitative trait locus, genome-wide scan, 2136
  selection, breeding scheme simulation, dairy cattle, 4023
fermentation, Monte Carlo simulation, digestibility, feed composition, 401
  wheat, dairy cow, digestibility, 3825
  yogurt manufacture, set yogurt, dissolved oxygen, 4112
fermentation characteristic, *Lactobacillus casei*, soymilk, bovine milk, 2468
fermentation time, yogurt, gelation, pH, 2977
fermented milk, rheology, chemoprevention, exopolysaccharide, 847
Fermenten, rumen pH, sucrose, sugar, 1725
ferritin, immunoassay, milk, α-casein, 3810
fertility, activity meter, heritability, estrus, 4683
  dairy cow, gene–gene interaction, survival rate, 6186
    luteal activity, genetic merit, 2159

days open, heat stress, dairy cattle, 4689
polymorphism, dairy cow, progesterone receptor, 4082
pregnancy, dairy cow, progesterone profile, 4919
recursive model, causal effect, health, 1778
somatic cell, Chile, dairy, 1575
trend, heat stress, conception rate, 4641
fertilization rate, candidate pathway, candidate gene, survival rate, 2238
fiber, supplemental fat, energy intake, forage, 6144
fiber composition, hay, neutral detergent fiber, disappearance kinetics, 2875
fiber digestion, red clover silage, grass silage, cow, 5634
Fior di Latte cheese, active coating, modified-atmosphere packaging, shelf life, 887
first lactation, digestibility, forage-to-concentrate ratio, yeast culture, 5100
first postpartum ovulation, dry period length, reproduction, 3081
fish meal, amino acid digestibility, distillers dried grains with solubles, 6056
fish oil, flavor, sensory evaluation, milk, 1378
micro-algae, milk composition, *cis*-9 *trans*-11 conjugated linoleic acid, 6156
flavor, bleach, whey protein concentrate, solid-phase microextraction, 5917
microfiltration, whey protein, serum protein, 4773
sensory evaluation, milk, fish oil, 1378
storage, dried dairy ingredient, whole milk powder, 2409
flavor quality, infrared spectroscopy, Cheddar cheese, 87
flavored yogurt, sensory quality, acceptability, camel milk, 857
flaxseed, canola seed, sunflower seed, methane, 2118
floor surface, locomotion, dairy cow, immune function, 4249
flooring, lameness, biomechanics, cattle, 972
flow behavior, sensory analysis, inulin, dairy dessert, 4188
flow cytometry, milk, neutrophil, bovine, 626
fluid milk spoilage, *Bacillus*, *Paenibacillus*, bacterial subtyping, 4833
flunixin meglumine, transition cow, pyrexia, metabolism, 1963
flux, serum protein, protein fractionation, microfiltration, 1361
foam stability, whey protein concentrate, high hydrostatic pressure, low-fat whipping cream, 3049
folic acid, dairy cow, rumen, 6116
folic acid, vitamin $B_{12}$, methionine and glucose kinetics, dairy cow, 677
rumen-protected methionine, dairy cow, 1685
follicular dynamic, somatotropin, n-3 fatty acid, 4876
food preservation, custard cream, bacteriocin, glycine, 2365
foodborne pathogen, ligase detection reaction, deoxyribonucleic acid array, mastitis, 3027
foot lesion, culling, survival analysis, 2572
risk factor, tie stall, free stall, 1404
forage, fiber, supplemental fat, energy intake, 6144
neutral detergent fiber digestibility, in vitro, 3842
protein, dairy cow, manure ammonia, 5607
forage management, no-till, phosphorus, simulation, 4086
forage tannins, manure chemistry, feces, urine, 1765
forage-to-concentrate ratio, gene expression, ruminal pH, volatile fatty acid absorption, 2767
N balance, limit feeding, dairy heifer, 2078
yeast culture, first lactation, digestibility, 5100
foraging behavior, appetite-regulating hormone, dairy cow, rumen fill, 2095
hunger-regulated hormones and metabolites, dairy cow, available grazing time, 4572
founder representation, Mendelian selection differential, inbreeding, marker-assisted selection, 2214
fractionation, short- and medium-chain fatty acid, butteroil, fatty acid ethyl ester, 1840
free fat, structure, spray-drying, powder physical property, 58
freestall, foot lesion, risk factor, tie stall, 1404
welfare, dairy cattle, skin lesion, 5487
freestall barn, design, maternity, milking, 2276
freestall design, open pack, dairy cattle, cow comfort, 5497
fresh cheese curd, aromatic starter strain, thermophilic starter, 1856
frozen milk, curd, γ-casein, river buffalo milk, 1319
full-fat corn germ, conjugated linoleic acid, milk fat, 3386
functional property, whey protein, heat denaturation, microfluidization, 1387
furosine method, homoarginine method, reactive lysine, 3951
*Fusarium* mycotoxin, deoxynivalenol, dairy cow, contaminated feedstuff, 1585

## G

G protein-coupled receptors GPR41 and GPR43, volatile fatty acids, cattle, 2696
gait score, lameness, sole ulcer, lying behavior, 4365
galactose, Mozzarella cheese whey, stretchwater, lactate, 5371
β-galactosidase, thermostable, immobilization, lactose hydrolysis, 491
gas chromatography, linear discriminant analysis, non-milk fat, milk fat, 1846
gas chromatography-mass spectrometry, milk processing, recycled water, wastewater, 3484
gastritis, preventive effect, lactic acid bacteria, exopolysaccharide, 2423
gel structure, glucono-δ-lactone, oxidoreduction potential, acid skim milk gel, 5898
gelation, pH, fermentation time, yogurt, 2977
gene, lipopolysaccharide, neutrophil, cytokine, 3185
gene by environment interaction, genome scan, selection for robustness, dense single nucleotide polymorphism marker genotyping, 4008
gene cassette, *Arcanobacterium* (*Actinomyces*) *pyogenes*, antimicrobial susceptibility, integron, 3659
gene expression, cow, liver, transition period, 1924
dairy cattle, dry period, heat stress, 5988
glucagon, gluconeogenesis, ureagenesis, 5092
growth hormone, mammary gland, bovine, 1889

Madin-Darby bovine kidney cell, peroxisome proliferator-activated receptor, fatty acid, 2027
mastitis, acute phase response, liver biopsy, 922
ruminal pH, volatile fatty acid absorption, forage-to-concentrate ratio, 2767
somatotropic axis, Holstein-Friesian, liver, 5229
gene polymorphism, mastitis, lactoferrin, genetic parameter, 2151
gene-assisted selection, dairy sheep, genetic improvement, 5814
gene–gene interaction, survival rate, fertility, dairy cow, 6186
generalized estimating equation, lameness, dairy cow, risk factor, 5476
genetic correlation, claw health, leg health, locomotion, 1770
Dutch Holstein-Friesian, protein composition, heritability, 1182
herd management level, environmental sensitivity, genotype by environment interaction, 4604
longevity, international evaluation, multiple-trait across country evaluation, 2338
milk coagulation property, mid-infrared spectroscopy, heritability, 5304
phenotypic correlation, persistency, disease, 1785
reproductive trait, yield trait, virgin heifer, 4055
genetic evaluation, best linear unbiased predictor, genomic selection, single nucleotide polymorphism, 4648
genetic parameter, model comparison, female fertility, 1229
genomic selection, relationship matrix, mixed model, 4656
model validation, animal model, female fertility, 4063
persistency, best prediction, 2248
genetic improvement, gene-assisted selection, dairy sheep, 5814
genetic merit, fertility, dairy cow, luteal activity, 2159
genetic parameter, gene polymorphism, mastitis, lactoferrin, 2151
length of productive life, Holstein, nongenetic effect, 2144
mastitis, somatic cell count, pathogen specific, 3457
maternal genetic effect, direct-maternal genetic correlation, calving ease, 2229
milk fatty acids, conjugated linoleic acid, stearoyl-CoA desaturase enzyme, 392
model comparison, female fertility, genetic evaluation, 1229
parametric correlation structure, covariance function, 4634
predicted cost, model comparison, clinical mastitis, 3472
random regression model, Chinese Holstein, 4697
genetic polymorphism, goat, casein haplotype, 6197
milk protein, cattle, 5335
genetic relationship, Holstein cow, inbreeding, 5760
genetic selection, nutrient partitioning, somatotropic axis, 526
genetic trend, twinning rate, linear model, threshold model, 3411
genetic variability, Holstein, heat stress, milk yield, 4035
genetics, heritability, *Mycobacterium bovis*, tuberculosis, 3447
genome scan, selection for robustness, dense single nucleotide polymorphism marker genotyping, gene by environment interaction, 4008
genome-wide scan, female fertility, quantitative trait locus, 2136
quantitative trait locus, fatty acid, dairy cattle, 4664
genomic prediction, genotyping, single-nucleotide polymorphism, 3431
reliability, evaluation accuracy, genomic selection, 16
genomic selection, breeding program, economics, deterministic approach, 382
selection index, 5292
genomic prediction, reliability, evaluation accuracy, 16
relationship matrix, mixed model, genetic evaluation, 4656
reliability, 433
single nucleotide polymorphism, genetic evaluation, best linear unbiased predictor, 4648
quantitative trait loci, calving trait, 2931
genomics, nuclear receptor, milk fat, 4276
genotype, feed system, reproductive performance, Holstein-Friesian dairy cow, 5258
genotype by environment interaction, female fertility, dairy cattle, 3437
genetic correlation, herd management level, environmental sensitivity, 4604
genotyping, single-nucleotide polymorphism, genomic prediction, 3431
lifetime net merit, predicted transmitting ability, 5248
gestation length, breed, twinning, heritability, 2259
Gibbs sampler, heterosis by environment interaction, reaction norm model, spline regression, 2204
globule, holography, milk fat, 95
glucagon, gluconeogenesis, ureagenesis, gene expression, 5092
milk protein composition, milk amino acid composition, dairy cow, 130
gluconeogenesis, dairy cow, transition, amino acid, 3306
ureagenesis, gene expression, glucagon, 5092
glucono-δ-lactone, oxidoreduction potential, acid skim milk gel, gel structure, 5898
glucose, dairy cow, splanchnic, amino acid, 3233
metabolism, transition, dairy cow, 1071
glucose infusion, lactation performance, blood metabolite, body condition, 5645
glucose metabolism, dairy cow, liver fat content, dry matter intake, 1554
propionic acid, amino acid, dairy cow, 3244
casein, dairy cow, 6068
glutathione peroxidase, bovine, mammary epithelial cell, selenomethionine, 2670
glycation, phosphorylation, physiological function, α-lactalbumin, 3057
glycerol, energy, biofuel, 5111
soybean oil, drinking water, transition period, 698
glycine, food preservation, custard cream, bacteriocin, 2365

goat, bolus, ear tag, electronic identification, 1500
$\alpha_{S1}$-casein, κ-casein, milk composition, 2960
casein haplotype, genetic polymorphism, 6197
farm, factory, cheese whey, 4792
horse, mastitis, *Streptococcus equi* ssp. *zooepidemicus*, 943
goat and cow milk, goat and cow milk lactosera, allergenicity, serology, 837
goat and cow milk lactosera, allergenicity, serology, goat and cow milk, 837
goat cheese, aroma active compound, headspace gas chromatography, 2435
goat kid, birth weight, litter size, immune passive transfer, 1616
immunoglobulin G, chitotriosidase, complement system, 1696
goat milk, total bacterial count, BactoScan flow cytometry, milk preservative, 4841
antibiotic residue, detection limit, β-lactam, 3585
residue screening test, antimicrobial, non-β-lactam, 4200
gram-negative, milk yield, recurrent clinical mastitis, gram-positive, 3091
gram-negative bacteria, prevalence, antimicrobial resistance, mastitis, 2020
gram-positive, gram-negative, milk yield, recurrent clinical mastitis, 3091
grass, legume, nitrogen utilization, nutrient demand, 1594
grass silage, cow, fiber digestion, red clover silage, 5634
digestibility, diet composition, dairy cow, 5019
digestibility, feed intake, dairy cow, 5031
grazing, herbage mass, pasture allowance, dairy cow, 414
milk fatty acid, vegetable oil, dairy cow, 4530
rumenic acid, vaccenic acid, conjugated linoleic acid, 3874
grazing behavior, halter, bite counter, feed intake, 996
milk production, restricted access, pasture, 168
pasture intake, dairy cow, time at pasture, 3331
grazing dairy cow, milk fat composition, strain, concentrate supplementation, 247
grinding, steam-rolling, lactating cow, barley grain, 3299
ground corn, ryegrass silage, corn silage, steam-flaked corn, 1117
growth, lactation performance, calf nutrition, milk replacer, 799
growth factor, dermis, keratinocyte, coronary region, 1913
sole ulceration, cytokine, 5977
growth hormone, mammary gland, bovine, gene expression, 1889
growth hormone receptor, insulin-like growth factor 1, dairy cow, nutrient partitioning, 2706

## H

Halloumi cheese, bovine milk, ovine milk, sensory properties, 4135
halter, bite counter, feed intake, grazing behavior, 996
haptoglobin, lactoferrin, mammary, lactation, 4439
metritis, transition cow, 621
hardness, continuous freezer, response surface methodology, ice cream, 5834
hay, neutral detergent fiber, disappearance kinetics, fiber composition, 2875
spontaneous heating, digestibility, dry matter loss, 2853
headspace gas chromatography, goat cheese, aroma active compound, 2435
health, automatic milk feeder, calf, feeding behavior, 4549
colostrum, heat treatment, blood immunoglobulin G, 3265
fertility, recursive model, causal effect, 1778
health and welfare, reproduction, review, body condition score, 5769
health monitoring, milk yield, statistical process control, electrical conductivity, 5964
health status, rumen development, weaning, dairy calf, 645
heat denaturation, microfluidization, functional property, whey protein, 1387
heat shock protein, sodium-butyrate and flavomycin as growth promoters, maturation of gastrointestinal tract, cholescystokinin/gastrin family peptides and insulin-like growth factor-I, 1038
heat stability, sonication, ultrasound, whey protein, 5353
heat stress, conception rate, fertility, trend, 4641
dairy cattle, fertility, days open, 4689
gene expression, dairy cattle, dry period, 5988
hyperthermia, yeast culture, metabolism, 935
milk yield, genetic variability, Holstein, 4035
somatotropin, metabolism, hyperthermia, 1986
temperature-humidity index, dairy cattle, rectal temperature, 109
thermolability, oocyte, embryo, 563
variance component, random regression model, 5702
heat supply, calf vigor, colostrum intake, hours of age, 3915
heat treatment, blood immunoglobulin G, health, colostrum, 3265
heat-induced protein structure and fraction, nutrient availability, rumen and intestine, synchrotron, 3319
heifer, component feeding, TMR, sorting, 1161
histology, mammary, nutrition, 499
mastitis, prepartum, dry cow treatment, 4395
milk, neutrophil apoptosis, early lactation, 4330
phosphorus, bone, 1741
hepatic gene expression, somatotropin, n-3 fatty acid, 4889
hepatic lipidosis, hypophosphatemia, hepatocyte, fatty liver, 2106
metabolic, n-3 fatty acid, peripartum, 657
hepatocyte, fatty liver, hepatic lipidosis, hypophosphatemia, 2106
herbage mass, daily herbage allowance, conjugated linoleic acid, linolenic acid, 5212
pasture allowance, dairy cow, grazing, 414
herd health, dairy calf, diarrhea, antimicrobial agent, 4707
waste milk, calf, 3503
herd management level, environmental sensitivity, genotype by environment interaction, genetic correlation, 4604
herd-level risk factor, multidrug-resistant *Salmonella*, dairy farm, 4229

heritability, correlation, metabolites, hormones, 4001
estrus, fertility, activity meter, 4683
genetic correlation, Dutch Holstein-Friesian, protein composition, 1182
milk coagulation property, mid-infrared spectroscopy, 5304
gestation length, breed, twinning, 2259
*Mycobacterium bovis*, tuberculosis, genetics, 3447
nongenetic variation, dairy cow, milk mineral, 5754
pregnancy loss, reproduction, anovulation, 5739
random regression, threshold model, conception rate, 2922
threshold model, alternative measures, mastitis, 3402
heterosis by environment interaction, reaction norm model, spline regression, Gibbs sampler, 2204
high ambient temperature, immune function, dairy cow, polyunsaturated fatty acid, 2796
high hydrostatic pressure, low-fat whipping cream, foam stability, whey protein concentrate, 3049
high throughput, cheese, manufacturing, screening, 5868
high-intensity pulsed-electric field, enterocin AS-48, nisin, milk, 2514
highly digestible pasture, concentrate supplementation, continuous culture fermentation, digestion, 189
high-moisture corn, diet fermentability, rumination, 160
high-performance liquid chromatography, microbial flow, purines, 1177
mouse milk composition, small sample volume, lactose, 632
high-pressure homogenization, particle size distribution, rheology, ice cream mix, 1864
high-protein distillers grains, milk production, corn milling (co)product, 2911
histology, mammary, nutrition, heifer, 499
holography, milk fat, globule, 95
Holstein, heat stress, milk yield, genetic variability, 4035
nongenetic effect, genetic parameter, length of productive life, 2144
Holstein cow, inbreeding, genetic relationship, 5760
Holstein-Friesian, Jersey, multibreed model, crossbreeding, 1240
liver, gene expression, somatotropic axis, 5229
Norwegian, lameness, claw characteristic, 2174
Holstein-Friesian dairy cow, genotype, feed system, reproductive performance, 5258
Holstein-Friesian strain, concentrate supplementation, intravenous glucose tolerance test, insulin resistance, 216
pregnancy, endometrium, fatty acid, 3723
home usage test, cottage cheese, preference mapping, qualitative multivariate analysis, 5883
homeopathic prophylaxis, reproductive performance, endometritis, 4945
homoarginine method, reactive lysine, furosine method, 3951
hormone, metabolite, extended lactation, pasture, 3704
heritability, correlation, metabolites, 4001
horse, mastitis, *Streptococcus equi* ssp. *zooepidemicus*, goat, 943
hot season, live yeast, feed efficiency, 343
hot-iron dehorning, local anesthetic, analgesia, dairy calf, 1512
hours of age, heat supply, calf vigor, colostrum intake, 3915
housing system, udder health, automatic milking, conventional milking, 3696
human milk, bovine milk, infant formula, osteopontin, 5378
human origin, *Bifidobacterium*, *Lactobacillus*, exopolysaccharide, 4158
humoral response, bovine leukocyte antigen DRB3.2*, bovine virus, 375
hunger-regulated hormones and metabolites, dairy cow, available grazing time, foraging behavior, 4572
hybrid vigor, Jersey, feed efficiency, crossbreeding, 6176
β-hydroxybutyrate, diagnostic test, whole blood, subclinical ketosis, 2618
hyperkeratosis, somatic cell count, risk factor, body condition score, 3106
udder hygiene score, clinical mastitis, risk factor, 2551
hyperketonemia, disease, milk production, dairy cow, 571
hyperthermia, heat stress, somatotropin, metabolism, 1986
yeast culture, metabolism, heat stress, 935
hypocalcemia, EDTA challenge, dietary cation-anion difference, timothy hay, 238
hypomagnesemia, near-infrared reflectance spectroscopy, *Phleum pratense*, milk fever, 4499
hypophosphatemia, hepatocyte, fatty liver, hepatic lipidosis, 2106

## I

ice cream, hardness, continuous freezer, response surface methodology, 5834
Nielsen home scan retail data, dairy demand, elasticity, 6210
ice cream mix, high-pressure homogenization, particle size distribution, rheology, 1864
ice cream pasteurization, dairy emulsion, whipping, triglyceride, 3566
IgG, serum protein, apparent efficiency of absorption, colostrum, 4565
Ile-Pro-Pro, angiotensin-converting enzyme-inhibiting peptide, cheese ripening, Val-Pro-Pro, 826
immobilization, lactose hydrolysis, β-galactosidase, thermostable, 491
immobilized digestive enzyme assay, amino acid digestibility, modified three-step procedure, 3939
immune function, dairy cow, polyunsaturated fatty acid, high ambient temperature, 2796
floor surface, locomotion, dairy cow, 4249
leptin, stanniocalcin-1, transition period, 1900
phosphorus, cattle, 365
immune passive transfer, goat kid, birth weight, litter size, 1616
immune response, Norwegian Red, crossbreeding, 518
udder health, crossbreeding, 749
immunity, dairy cow, energy balance, mastitis, 4301
immunoassay, milk, α-casein, ferritin, 3810

immunoglobulin, colostrum, colostrum replacer, passive transfer, 1750
immunoglobulin E, milk protein, allergy, systemic anaphylaxis, 4738
immunoglobulin G, antigen-release device, implantation, specific immune milk, 100
chitotriosidase, complement system, goat kid, 1696
dairy calf, failure of passive transfer of immunity, risk factor, 3973
immunomagnetic separation, polymerase chain reaction, *Salmonella*, 2382
implantation, specific immune milk, immunoglobulin G, antigen-release device, 100
in situ protein degradation, microbial protein synthesis, metabolizable protein, milk protein yield, 1633
in vitro, forage, neutral detergent fiber digestibility, 3842
neutral detergent fiber digestion, rumen fluid standardization, 3833
inbreeding, dairy cattle, variance components model, quantitative trait locus mapping, 765
genetic relationship, Holstein cow, 5760
marker-assisted selection, founder representation, Mendelian selection differential, 2214
incidence, salmonellosis, dairy herd, 3766
incidence rate, introduction, multidrug-resistant Salmonella, dairy farm, 4218
income over feed cost, dairy cow, Mycobacterium paratuberculosis shedding, milk production, 4929
indirect calorimetry, dairy cow, feed intake, physical activity, 2804
individual feeding, milking frequency, starchy pellet, robotic milking, 2317
infant formula, osteopontin, human milk, bovine milk, 5378
infection, contagious transmission, mastitis, biosecurity, 4717
*Enterococcus faecium*, intramammary challenge, 3158
infection dynamics, dairy herd, longitudinal study, epidemiology and food safety, 1811
inflammation, mammary gland, periparturient period, oxidative stress, 589
inflammatory bowel disease, Johne's disease, probiotic, *Dietzia*, 4846
infrared, chemometrics, adjunct culture, Swiss cheese, 3575
fatty acid composition, interference filter, 2485
infrared milk analysis, fatty acid composition, 2502
infrared spectroscopy, Cheddar cheese, flavor quality, 87
innate immunity, mastitis, acute phase protein, dairy cow, 980
Muc1, mucin, polymorphism, 5276
inoculant, aerobic stability, corn silage, 3907
insertion sequence IS900, polymerase chain reaction, Johne's disease, *Mycobacterium avium* subspecies *paratuberculosis*, 5408
insulin resistance, Holstein-Friesian strain, concentrate supplementation, intravenous glucose tolerance test, 216
insulin sensitivity, neonatal calf, congenital, dairy cow, 4404
insulin-like growth factor 1, dairy cow, nutrient partitioning, growth hormone receptor, 2706
insulin-like growth factor-I, osteoblast, differentiation, whey protein, 3014
intake, dairy cow, DL-malic acid, methane, 3258
lactating cow, periparturient cow, essential oil, 1734
milk production, neutral detergent fiber digestibility, neutral detergent fiber, 313
integron, gene cassette, *Arcanobacterium* (*Actinomyces*) *pyogenes*, antimicrobial susceptibility, 3659
interference filter, infrared, fatty acid composition, 2485
interim evaluation, progeny test, daughter performance, 2348
internal control gene, transcriptomics, milk fat, 2007
international evaluation, multiple-trait across country evaluation, genetic correlation, longevity, 2338
intestinal absorption, dairy cow, vitamin $B_{12}$, ruminal synthesis, 4524
intestinal barrier, myosin light-chain kinase, *Lactobacillus rhamnosus*, colitis, 2400
intramammary challenge, infection, *Enterococcus faecium*, 3158
intravenous glucose tolerance test, insulin resistance, Holstein-Friesian strain, concentrate supplementation, 216
introduction, multidrug-resistant *Salmonella*, dairy farm, incidence rate, 4218
inulin, dairy dessert, flow behavior, sensory analysis, 4188
iodine, dairy goat, milk, 5133
milk, rapeseed meal, dairy cow, 4514
ionophore, soybean oil, rumen microbial diversity, continuous culture, 4467
iron, silage, bioavailability, cattle, 2896
isolation, sodium dodecyl sulfate-PAGE, silver staining, milk fat globule membrane protein, 3592
isothermal titration calorimetry, protein, polyphenol, proanthocyanidin, 5843

## J

Jersey, feed efficiency, crossbreeding, hybrid vigor, 6176
multibreed model, crossbreeding, Holstein-Friesian, 1240
stearoyl-CoA desaturase 1, desaturase index, fatty acid composition, 1220
Johne's disease, milk production, 2653
*Mycobacterium avium* subspecies *paratuberculosis*, insertion sequence IS900, polymerase chain reaction, 5408
probiotic, *Dietzia*, inflammatory bowel disease, 4846

## K

kanamycin, bovine mastitis, antibiotic combination, cefalexin, 6217
kefir, entrapment, kefir grains, 3002
kefir grains, kefir, entrapment, 3002
keratinocyte, coronary region, growth factor, dermis, 1913

## L

α-lactalbumin, glycation, phosphorylation, physiological function, 3057

β-lactam, goat's milk, antibiotic residue, detection limit, 3585
lactate, galactose, Mozzarella cheese whey, stretchwater, 5371
lactating cow, barley grain, grinding, steam-rolling, 3299
periparturient cow, essential oil, intake, 1734
starch, corn, digestibility, 4541
lactating dairy cow, adsorbent, aflatoxin $B_1$, aflatoxin $M_1$, 3959
canola meal, distillers grain with solubles, 5669
phosphorus requirement, maintenance requirement, 708
lactating goat, lipid supplementation, milk composition, mammary transcriptome, 5544
plant oil, lipogenic gene expression, milk fatty acid secretion, 6083
lactation, adenosine triphosphate, mitochondria, mammary, 2038
amylase, enzyme, 1050
body composition, dairy goat, 3374
haptoglobin, lactoferrin, mammary, 4439
mammary gland, conjugated linoleic acid, fatty acid transporters, 1169
milk composition, body weight, model, 5043
milk fat, *trans* fatty acid, conjugated linoleic acid, 4317
milk secretion, tight junction, dromedary, 1452
sodium, potassium, dietary cation-anion difference, 2711
somatotropin, n-3 fatty acid, 4852
lactation curve, water intake, dry matter intake, dairy cow, 4072
lactation performance, blood metabolite, body condition, glucose infusion, 5645
calf nutrition, milk replacer, growth, 799
lactation stage, dairy cattle, fatty acid, milk composition, 1469
lactic acid, dairy cow, rumen fermentation, barley grain, 6023
lactic acid bacteria, exopolysaccharide, gastritis, preventive effect, 2423
propionibacteria, bifidobacteria, proteomics, 811
lacticin 481, raw ewes' milk, lactococcus, nisin, 4805
*Lactobacillus*, exopolysaccharide, human origin, *Bifidobacterium*, 4158
*Lactobacillus acidophilus*, probiotic, microarray analysis, dairy, 870
*Lactobacillus buchneri*, aerobic stability, esterase, neutral detergent fiber digestibility, 732
molasses, aerobic stability, silage, 690
real-time quantitative PCR, alfalfa silage, 5005
spoilage, silage, 1174
*Lactobacillus casei*, soymilk, bovine milk, fermentation characteristic, 2468
*Lactobacillus rhamnosus*, colitis, intestinal barrier, myosin light-chain kinase, 2400
lactobionic acid, *Acetobacter orientalis*, Caspian Sea yogurt, 25
lactococcus, nisin, lacticin 481, raw ewes' milk, 4805
lactoferricin, CaCo-2, cancer, cell cycle kinetics, 2477
lactoferrin, genetic parameter, gene polymorphism, mastitis, 2151
mammary, lactation, haptoglobin, 4439
lactoferrin, microbial infection, neonatal calf, experimental model, 5534
β-lactoglobulin phenotype, dairy cow, fat feeding, protein composition, 197
lactose, high-performance liquid chromatography, mouse milk composition, small sample volume, 632
lactose hydrolysis, β-galactosidase, thermostable, immobilization, 491
lactosylation, Maillard reaction at low pH, emulsion, whey glycoprotein, 35
lameness, biomechanics, cattle, flooring, 972
bovine laminitis, oligofructose overload, acute ruminal acidosis, 607
claw characteristic, Holstein-Friesian, Norwegian, 2174
dairy cow, risk factor, generalized estimating equation, 5476
digital cushion, body condition score, dairy cow, 3175
limb movement variable, spline transformation, dairy cattle, 2539
pain, salicylate, amphotericin B, 3731
risk factor, claw lesion, 3165
ruminal acidosis, rising behavior, oligofructose, 617
sole ulcer, lying behavior, gait score, 4365
tie-stall, welfare, cattle, 1567
udder cleanliness, stall design, cow comfort, 3074
welfare, dairy cow, weight distribution, 581
lauric acid, myristic acid, coconut oil, protozoa, 5561
lauric arginate, shelf life, milk, 4207
leg health, locomotion, genetic correlation, claw health, 1770
legume, nitrogen utilization, nutrient demand, grass, 1594
length of productive life, Holstein, nongenetic effect, genetic parameter, 2144
leptin, puberty, dairy heifer, nutrition, 1430
stanniocalcin-1, transition period, immune function, 1900
leukocyte differential count, endogenous enzyme, proteolysis, milk coagulation properties, 79
lifetime net merit, predicted transmitting ability, genotyping, single nucleotide polymorphism, 5248
ligase detection reaction, deoxyribonucleic acid array, mastitis, foodborne pathogen, 3027
limb movement variable, spline transformation, dairy cattle, lameness, 2539
limit feeding, dairy heifer, forage:concentrate, N balance, 2078
linear discriminant analysis, non-milk fat, milk fat, gas chromatography, 1846
linear model, threshold model, genetic trend, twinning rate, 3411
liner compression, vacuum, b-phase duration, pulsation, 913
lingual antimicrobial peptide, milk, bovine, defensin, 2691
milk, dairy cow, lipopolysaccharide, 6046
linkage disequilibrium, *Bos taurus* autosome 18, mastitis, somatic cell score, 4046
α-linolenic acid, biohydrogenation, condensed tannin, 177

linolenic acid, herbage mass, daily herbage allowance, conjugated linoleic acid, 5212
linseed, cheese odor compound, supplemented diet, α-tocopherol, 3040
linseed, milk fatty acid, dairy cow, linseed oil, 5199
linseed oil, linseed, milk fatty acid, dairy cow, 5199
liver triglyceride, bovine, 4954
lipid homeostasis, mammary gland, ATP-binding cassette transporter, cholesterol, 3744
lipid metabolism, dry period, rumen-protected fat, dairy cow, 1670
stearoyl-coenzyme A desaturase, conjugated linoleic acid, 5167
lipid supplementation, milk composition, mammary transcriptome, lactating goat, 5544
lipocalin, odorant-binding protein, pheromone transport, colostrum, 4992
lipogenic gene expression, milk fatty acid secretion, lactating goat, plant oil, 6083
lipoperoxidation, antioxidant, plasma, 18:3 n-3, 6095
lipopolysaccharide, acute phase response, subacute ruminal acidosis, 1712
lingual antimicrobial peptide, milk, dairy cow, 6046
neutrophil, cytokine, gene, 3185
lipopolysaccharide translocation, acute phase response, subacute ruminal acidosis, 1060
*Listeria monocytogenes*, ultra-high-pressure homogenization, fat, 5396
litter size, immune passive transfer, goat kid, birth weight, 1616
live yeast, feed efficiency, hot season, 343
liver, gene expression, somatotropic axis, Holstein-Friesian, 5229
transition period, gene expression, cow, 1924
liver biopsy, gene expression, mastitis, acute phase response, 922
liver fat content, dry matter intake, glucose metabolism, dairy cow, 1554
liver triglyceride, bovine, linseed oil, 4954
local anesthetic, analgesia, dairy calf, hot-iron dehorning, 1512
locomotion, alley floor, trimming method, claw health and conformation, 960
dairy cow, immune function, floor surface, 4249
genetic correlation, claw health, leg health, 1770
long lactation, best prediction, milk yield, 1796
longevity, international evaluation, multiple-trait across country evaluation, genetic correlation, 2338
survival analysis, dairy sheep, somatic cell count, 6160
longitudinal study, epidemiology and food safety, infection dynamics, dairy herd, 1811
low fat, cheese, texture, rheology, 4756
low-fat whipping cream, foam stability, whey protein concentrate, high hydrostatic pressure, 3049
low-fat yogurt, reduced-fat yogurt, quality control, artificial neural network, 4797
luteal activity, genetic merit, fertility, dairy cow, 2159
luteal phase, bovine, resistant nonlinear smoothing, progesterone, 1460
lycopene, tocopherol, mixed micelle, milk fat globule membrane, 2524
lying, standing, validation, activity, 3397
lying behavior, cow comfort index, dairy cow, 4412
gait score, lameness, sole ulcer, 4365
lysine, methionine, milk protein, meta-analysis, 5011
lysostaphin, processing, transgenic cow, milk, 444

## M

Madin-Darby bovine kidney cell, peroxisome proliferator-activated receptor, fatty acid, gene expression, 2027
Maillard reaction at low pH, emulsion, whey glycoprotein, lactosylation, 35
maintenance requirement, lactating dairy cow, phosphorus requirement, 708
DL-malic acid, methane, intake, dairy cow, 3258
mammary, lactation, adenosine triphosphate, mitochondria, 2038
haptoglobin, lactoferrin, 4439
nutrition, heifer, histology, 499
mammary blood flow, mammary glucose uptake, refeeding, mammary metabolism, 1543
mammary epithelial cell, dairy cattle, quantitative trait locus, mastitis, 4621
selenomethionine, glutathione peroxidase, bovine, 2670
mammary gland, ATP-binding cassette transporter, cholesterol, lipid homeostasis, 3744
bovine, gene expression, growth hormone, 1889
conjugated linoleic acid, fatty acid transporters, lactation, 1169
dairy cow, phosphodiesterase, 3757
milk replacer, prepubertal heifer, stem cell, 5937
periparturient period, oxidative stress, inflammation, 589
mammary glucose uptake, refeeding, mammary metabolism, mammary blood flow, 1543
mammary metabolism, mammary blood flow, mammary glucose uptake, refeeding, 1543
mammary tight junction, milking omission, milking frequency, dairy sheep, 3684
mammary transcriptome, lactating goat, lipid supplementation, milk composition, 5544
management, dry period, mastitis, dairy cattle, 3150
traffic, behavior, feeding, 1272

natural service, reproductive performance, dairy cow, timed artificial insemination, 5456
ND1 gene, polymerase chain reaction, yak milk, bovine milk, 1354
near-infrared reflectance spectroscopy, neutral detergent-soluble carbohydrate, timothy, alfalfa, 1702
*Phleum pratense*, milk fever, hypomagnesemia, 4499
necropsy, dairy, cow, mortality, 1954
neonatal calf, congenital, dairy cow, insulin sensitivity, 4404
experimental model, lactoferrin, microbial infection, 5534
neonatal immunity, calf physiology, preruminant calf, cold stress, 6134
neonatal nutrition, preruminant calf, vitamin D status, 5692
neural network, mastitis, somatic cell count, electrical resistance, 1493
neutral detergent fiber, disappearance kinetics, fiber composition, hay, 2875
intake, milk production, neutral detergent fiber digestibility, 313
neutral detergent fiber digestibility, in vitro, forage, 3842
*Lactobacillus buchneri*, aerobic stability, esterase, 732
neutral detergent fiber, intake, milk production, 313
rumen fluid standardization, in vitro, 3833
neutral detergent-soluble carbohydrate, timothy, alfalfa, near-infrared reflectance spectroscopy, 1702
neutrophil, bovine, flow cytometry, milk, 626
cytokine, gene, lipopolysaccharide, 3185
vitamin E, stereoisomer, dairy cow, 720
neutrophil apoptosis, early lactation, heifer, milk, 4330
new case, subclinical mastitis, test-day model, production loss, 599
Nielsen home scan retail data, dairy demand, elasticity, ice cream, 6210
nipple bottle, esophageal tube feeder, passive transfer, colostrum, 1758
nisin, lacticin 481, raw ewes' milk, lactococcus, 4805
milk, high-intensity pulsed-electric field, enterocin AS-48, 2514

nitazoxanide, cryptosporidiosis, diarrhea, dairy calf, 1643
nitrogen, ammonia, emissions, dairy, 2326
phosphorus, dairy farm, 204
nitrogen balance, organoleptic quality, red clover silage, milk fatty acids, 1148
nitrogen efficiency, alfalfa silage storage structure, rumen-protected methionine, milk yield, 1281
rumen-protected methionine, dietary crude protein, milk yield, 2719
nitrogen metabolism, amino acid supply, dairy cow, red clover silage, 5620
nitrogen utilization, nutrient demand, grass, legume, 1594
no growth, polymerase chain reaction, mastitis, bacterial culture, 2610
nongenetic effect, genetic parameter, length of productive life, Holstein, 2144
nongenetic variation, dairy cow, milk mineral, heritability, 5754
nonlactating cow, dietary cation-anion difference, silage, mineral absorption, 2067
non-milk fat, milk fat, gas chromatography, linear discriminant analysis, 1846
nonprotein nitrogen, true protein, microbial protein synthesis, rumen-degraded protein, 2822
nonreturn rate, reproduction, breeding, conception rate, 3517
nonsteroidal antiinflammatory drug, clinical mastitis, therapy, 4421
non-β-lactam, goat's milk, residue screening test, antimicrobial, 4200
Norwegian, lameness, claw characteristic, Holstein-Friesian, 2174
Norwegian Red, crossbreeding, immune response, 518
udder health, crossbreeding, immune response, 749
no-till, phosphorus, simulation, forage management, 4086
nuclear receptor, milk fat, genomics, 4276
transcription regulator, transcriptomics, 4290
nutrient availability, rumen and intestine, synchrotron, heat-induced protein structure and fraction, 3319
nutrient demand, grass, legume, nitrogen utilization, 1594
nutrient management, biofuel, distillers dried grains with solubles, dairy farm returns, 6105
nutrient partitioning, growth hormone receptor, insulin-like growth factor 1, dairy cow, 2706
somatotropic axis, genetic selection, 526
nutrition, heifer, histology, mammary, 499
leptin, puberty, dairy heifer, 1430

## O

odorant-binding protein, pheromone transport, colostrum, lipocalin, 4992
off-feed, acidosis, modeling, dairy goat, 3894
oligofructose, lameness, ruminal acidosis, rising behavior, 617
oligofructose overload, acute ruminal acidosis, lameness, bovine laminitis, 607
oligosaccharide, bovine milk, mass spectrometry, 2991
once-daily milking, milk composition, cheese yield, cheese sensory quality, 4730
milk quality, dairy goat, udder cisternal size, 5447
on-farm test, subclinical mastitis, somatic cell count, 990
oocyte, embryo, heat stress, thermolability, 563
open pack, dairy cattle, cow comfort, free-stall design, 5497
oral electrolyte solution, strong-ion difference, rehydration, calf diarrhea, 296
oral rehydration solution, strong ion difference, calf, milk clotting, 1649
ordinal threshold model, probit model, mastitis, Poisson model, 5239
organic farming, dairy cow, somatic cell count, 3775
organic milk, dairy cow diet, ratio between n-6 and n-3, antioxidant, 2057
organoleptic quality, red clover silage, milk fatty acids, nitrogen balance, 1148
osteoblast, differentiation, whey protein, insulin-like growth factor-I, 3014
osteopontin, human milk, bovine milk, infant formula, 5378
ovine milk, sensory properties, Hallouni cheese, bovine milk, 4135
Ovsynch, additional prostaglandin $F_{2\alpha}$, estradiol, 1412
oxidative stress, inflammation, mammary gland, periparturient period, 589
oxidoreduction potential, acid skim milk gel, gel structure, glucono-δ-lactone, 5898

## P

packaging type, Ezine cheese, aroma, proteolysis, 4146
*Paenibacillus*, bacterial subtyping, fluid milk spoilage, *Bacillus*, 4833
milk, pasteurization, *Bacillus*, 4823
pain, dehorning, disbudding, meloxicam, 540
salicylate, amphotericin B, lameness, 3731
parametric correlation structure, covariance function, genetic parameter, 4634
paratuberculosis, antibody profile, milk enzyme-linked immunosorbent assay, milk production, 149
parentage testing, pedigree record, single nucleotide polymorphism, bovine, 369
particle size, particle size distribution, casein micelle, dynamic light scattering, 1829
particle size distribution, casein micelle, dynamic light scattering, particle size, 1829
rheology, ice cream mix, high-pressure homogenization, 1864
particulate size, disease potential, dairy aerosolized dust, 6033
passive transfer, colostrum, nipple bottle, esophageal tube feeder, 1758
immunoglobulin, colostrum, colostrum replacer, 1750
pasteurization, *Bacillus*, *Paenibacillus*, milk, 4823
pasture, grazing behavior, milk production, restricted access, 168
hormone, metabolite, extended lactation, 3704
motivation, cow comfort, animal welfare, 3651

sheep, cereal supplement, conjugated linoleic acid, 3964
pasture allowance, dairy cow, grazing, herbage mass, 414
pasture and grain, associative effect, digestion and rumen fermentation, dairy cow, 2747
pasture and grain diet, total mixed ration, dairy cow, extended lactation, 1479
pasture intake, dairy cow, time at pasture, grazing behavior, 3331
pathogen, artificial neural network, mastitis, metabolite, 4901
dairy, clinical mastitis, diagnosis, 2598
pathogen specific, genetic parameter, mastitis, somatic cell count, 3457
PCR sequence-based typing, allele genotyping, biotechnology, cattle major histocompatibility complex (BoLA) class II DRB3 gene, 2965
Pecorino cheese, conjugated linoleic acid, rennet paste, probiotic, 1330
pedigree record, single nucleotide polymorphism, bovine, parentage testing, 369
peripartum, hepatic lipidosis, metabolic, n-3 fatty acid, 657
periparturient cow, chromium, barley and corn grain, 5411
essential oil, intake, lactating cow, 1734
periparturient period, oxidative stress, inflammation, mammary gland, 589
peroxisome proliferator-activated receptor, fatty acid, gene expression, Madin-Darby bovine kidney cell, 2027
peroxisome proliferator-activated receptor-α, peroxisome proliferator-activated receptor-δ, retinoid X receptor α, milk, 4180
peroxisome proliferator-activated receptor-δ, retinoid X receptor α, milk, peroxisome proliferator-activated receptor-α, 4180
peroxisome proliferator-activated receptor-γ, transition cow, thiazolidinedione, 3623
persistency, best prediction, genetic evaluation, 2248
disease, genetic correlation, phenotypic correlation, 1785
Petrifilm, mastitis, culture, Bi-plate, 2297
milk, mesophilic aerobe, enumeration method, 3069
Petrifilm Staph Express, mastitis, culture, Tri-plate, 5326
pH, biohydrogenation, concentrate, polymerase chain reaction, 4456
fermentation time, yogurt, gelation, 2977
pharmacokinetics, milking frequency, cephapirin, 4262
phenotypic correlation, persistency, disease, genetic correlation, 1785

proteinase, apoptosis, dairy cow, tight junction, 1998
proteolysis, angiotensin-I-converting-enzyme, rheology, exopolysaccharide, 895
milk coagulation properties, leukocyte differential count, endogenous enzyme, 79
packaging type, Ezine cheese, aroma, 4146
yogurt, capillary electrophoresis, ultra-high pressure homogenization, 71
proteomics, lactic acid bacteria, propionibacteria, bifidobacteria, 811
protozoa, bromoethanesulfonate, monensin, methane, 3849
lauric acid, myristic acid, coconut oil, 5561
protozoal 18S ribosomal DNA copies, rumen protozoal growth, protozoal generation time, monensin, 256
protozoal generation time, monensin, protozoal 18S ribosomal DNA copies, rumen protozoal growth, 256
protozoon, tannin, methane, methanogenic archaea, 5512
puberty, dairy heifer, nutrition, leptin, 1430
puerperal cow, *Escherichia coli*, virulence factor gene, biofilm, 6000
pulsation, liner compression, vacuum, b-phase duration, 913
purines, high-performance liquid chromatography, microbial flow, 1177
pyrexia, metabolism, flunixin meglumine, transition cow, 1963

## Q

qualitative multivariate analysis, home usage test, cottage cheese, preference mapping, 5883
quality, milk, fatty acid, mid-infrared, 6202
quality control, artificial neural network, low-fat yogurt, reduced-fat yogurt, 4797
quantitative real-time PCR, reliability, environmental sampling, *Mycobacterium avium* ssp. *paratuberculosis*, 3634
quantitative trait locus, calving trait, genomic selection, single nucleotide polymorphism, 2931
dairy cow, diacylglycerol acyltransferase 1, fatty acid, 4676
fatty acid, dairy cattle, genome-wide scan, 4664
female fertility, milk production trait, cattle, 5712
genome-wide scan, female fertility, 2136
mastitis, mammary epithelial cell, dairy cattle, 4621
quantitative trait locus mapping, inbreeding, dairy cattle, variance components model, 765
*Quillaja saponaria*, methane, rumen fermentation, *Yucca schidigera*, 2809

## R

random regression, threshold model, conception rate, heritability, 2922
random regression model, Chinese Holstein, genetic parameter, 4697
heat stress, variance component, 5702
test-day record, variance-component estimation, 5314
randomized incomplete block design, mixed model, factorial experiment, central composite design, 4581
rapeseed meal, dairy cow, iodine, milk, 4514
rapid, pregnancy test, pregnancy-associated glycoproteins (PAG), blood, 3819
ratio between n-6 and n-3, antioxidant, organic milk, dairy cow diet, 2057
raw ewes' milk, lactococcus, nisin, lacticin 481, 4805
raw milk quality, wash water quality, spatial epidemiology, 3714
reaction norm model, spline regression, Gibbs sampler, heterosis by environment interaction, 2204
reactive lysine, furosine method, homoarginine method, 3951
real-time PCR, validation, bovine intramammary infection, 952
real-time quantitative PCR, alfalfa silage, *Lactobacillus buchneri*, 5005
rectal temperature, heat stress, temperature-humidity index, dairy cattle, 109
recurrent clinical mastitis, gram-positive, gram-negative, milk yield, 3091
recursive model, causal effect, health, fertility, 1778
recycled water, wastewater, gas chromatography-mass spectrometry, milk processing, 3484
red clover, polyphenol oxidase, N use efficiency, polyunsaturated fatty acid, 1136
red clover silage, grass silage, cow, fiber digestion, 5634
milk fatty acids, nitrogen balance, organoleptic quality, 1148
nitrogen metabolism, amino acid supply, dairy cow, 5620
reduced-fat Cheddar cheese, n-3 fatty acid, docosahexaenoic acid, eicosapentaenoic acid, 1876
reduced-fat yogurt, quality control, artificial neural network, low-fat yogurt, 4797
refeeding, mammary metabolism, mammary blood flow, mammary glucose uptake, 1543
regression analysis, commercial wheat silage, digestibility, 638
regulated gene expression, SLC3, SLC6, and SLC7, bovine, 1124
rehydration, calf diarrhea, oral electrolyte solution, strong-ion difference, 296
relationship matrix, mixed model, genetic evaluation, genomic selection, 4656
relative contribution, selection index, relative emphasis, 6192
relative emphasis, relative contribution, selection index, 6192
reliability, environmental sampling, *Mycobacterium avium* ssp. *paratuberculosis*, quantitative real-time PCR, 3634
evaluation accuracy, genomic selection, genomic prediction, 16
genomic selection, 433
rennet paste, probiotic, Pecorino cheese, conjugated linoleic acid, 1330
replacement cost, mastitis cost, clinical mastitis, calf rearing, 3274
reproduction, anovulation, heritability, pregnancy loss, 5739
body weight, dairy cow, body condition scoring, 4375
breeding, conception rate, nonreturn rate, 3517
ceftiofur hydrochloride, dairy cow, endometritis, 1532
dairy cow, dietary fatty acid, feed restriction, 2562
dairy cow, embryo quality, fatty acid, 1520
energy balance, progesterone, conception, 2737
fatty acid, survival analysis, conjugated linoleic acid, 2662
first postpartum ovulation, dry period length, 3081
review, body condition score, health and welfare, 5769
timed artificial insemination, dairy cow, progesterone, 5436
reproductive management, decision support, stochastic dominance, 1290
reproductive performance, dairy cow, timed artificial insemination, natural service, 5456
endometritis, homeopathic prophylaxis, 4945
Holstein-Friesian dairy cow, genotype, feed system, 5258
reproductive trait, yield trait, virgin heifer, genetic correlation, 4055
residue screening test, antimicrobial, non-β-lactam, goat's milk, 4200
resistance, mastitis, antimicrobial, susceptibility, 2589
resistant nonlinear smoothing, progesterone, luteal phase, bovine, 1460
respiratory disease, virus, risk factor, calf, 5139

response surface methodology, ice cream, hardness, continuous freezer, 5834
restricted access, pasture, grazing behavior, milk production, 168
restricted index, total milk yield, total lactation persistency, criterion, 2915
resumption of cyclicity, dry period, feeding level, energy balance, 6011
resynchronization, transrectal ultrasonography, pregnancy-associated glycoprotein, 3643
retention time, Rusitec, microbial growth, dilution rate, 3930
retinoid X receptor α, milk, peroxisome proliferator-activated receptor-α, peroxisome proliferator-activated receptor-δ, 4180
Reunion Island, milk production, efficiency analysis, 3676
review, body condition score, health and welfare, reproduction, 5769
rheology, chemoprevention, exopolysaccharide, fermented milk, 847
  exopolysaccharide, proteolysis, angiotensin-I-converting-enzyme, 895
  ice cream mix, high-pressure homogenization, particle size distribution, 1864
  low fat, cheese, texture, 4756
rising behavior, oligofructose, lameness, ruminal acidosis, 617
risk communication, bovine veterinarian, antibiotic resistance, 3494
risk factor, body condition score, hyperkeratosis, somatic cell count, 3106
  bulk tank milk, bacteria quality testing, 2634, 2644
  calf, enteropathogen, diarrhea, 5057
    mortality, dairy, 2782
    respiratory disease, virus, 5139
  cephalosporin, clinical mastitis, treatment, 1941
  *Chlamydophila* spp., dairy farm, prevalence, 4347
  claw lesion, lameness, 3165
  generalized estimating equation, lameness, dairy cow, 5476
  hyperkeratosis, udder hygiene score, clinical mastitis, 2551
  immunoglobulin G, dairy calf, failure of passive transfer of immunity, 3973
  tie stall, free stall, foot lesion, 1404
river buffalo milk, frozen milk, curd, γ-casein, 1319
robotic milking, individual feeding, milking frequency, starchy pellet, 2317
rubber mat, asphalt floor, claw growth, concrete floor, 2625
rumen, calcium requirement, cellulolytic bacteria, 5079
  folic acid, dairy cow, 6116
rumen and intestine, synchrotron, heat-induced protein structure and fraction, nutrient availability, 3319
rumen development, weaning, dairy calf, health status, 645
rumen fermentation, barley grain, lactic acid, dairy cow, 6023
  *Yucca schidigera*, *Quillaja saponaria*, methane, 2809
rumen fill, foraging behavior, appetite-regulating hormone, dairy cow, 2095
rumen fluid standardization, in vitro, neutral detergent fiber digestion, 3833
rumen lipopolysaccharide, C-reactive protein, dairy cow, milk fat depression, 3800
rumen microbial diversity, continuous culture, ionophore, soybean oil, 4467
rumen passage rate, ruminal particle dynamics, modeling, 3981
rumen pH, sucrose, sugar, Fermenten, 1725
    transition period, postpartum, 3341
rumen protozoal growth, protozoal generation time, monensin, protozoal 18S ribosomal DNA copies, 256
rumen-degraded protein, nonprotein nitrogen, true protein, microbial protein synthesis, 2822
rumenic acid, vaccenic acid, conjugated linoleic acid, grazing, 3874
rumen-protected choline, dry propylene glycol, feed intake, blood parameter, 2729
rumen-protected fat, dairy cow, lipid metabolism, dry period, 1670
rumen-protected methionine, dairy cow, folic acid, vitamin $B_{12}$, 1685
  dietary crude protein, milk yield, nitrogen efficiency, 2719
  milk yield, nitrogen efficiency, alfalfa silage storage structure, 1281
rumen-undegradable protein, soybean meal, amino acid digestibility, 4489
ruminal acidosis, rising behavior, oligofructose, lameness, 617
ruminal fermentation, coproduct, dairy, milk production, 5120
  plasma glucose, serum insulin, propylene glycol, 4555
ruminal particle dynamics, modeling, rumen passage rate, 3981
ruminal pH, acidosis, physically effective fiber, chewing, 1603
  dietary fiber, milk fat depression, polyunsaturated fatty acid, 1108
  telemetry, ruminal temperature, 5697
  volatile fatty acid absorption, forage-to-concentrate ratio, gene expression, 2767
ruminal synthesis, intestinal absorption, dairy cow, vitamin $B_{12}$, 4524
ruminal temperature, ruminal pH, telemetry, 5697
ruminant, meta-analysis, yeast, *Saccharomyces cerevisiae*, 1620
rumination, acidosis, behavior, 5067
  early-lactating cow, dry matter and neutral detergent fiber digestibility, eating behavior, 3364
  feeding behavior, dairy cow, validation, 6052
  high-moisture corn, diet fermentability, 160
Rusitec, microbial growth, dilution rate, retention time, 3930
ryegrass silage, corn silage, steam-flaked corn, ground corn, 1117

## S

*Saccharomyces cerevisiae*, ruminant, meta-analysis, yeast, 1620
salicylate, amphotericin B, lameness, pain, 3731
*Salmonella*, immunomagnetic separation, polymerase chain reaction, 2382
salmonellosis, dairy herd, incidence, 3766
sample size, case definition, meta-analysis, dairy cow, 3545
sampling, fat, protein, milk recording, 4914
scanning electron microscopy, microstructure, rehydration, powder, milk protein
SCD1, dairy cattle, milk fat composition, DGAT1, 5720
scope of inference, experimental design, experimental unit, 1
screening, high throughput, cheese, manufacturing, 5868
season, temperature-humidity index, dairy cow, mortality, 3781
seasonal variation, milk composition, fatty acid, protein, 4745
secondary proteolysis, sensory characteristic, probiotic cheese, multivariate analysis, 2455
selection, breeding scheme simulation, dairy cattle, female fertility, 4023
mastitis, culling, 2224
selection for robustness, dense single nucleotide polymorphism marker genotyping, gene by environment interaction, genome scan, 4008
selection index, genomic selection, breeding program, 5292
relative emphasis, relative contribution, 6192
selection response, milk production, sire evaluation, Mexico, 5270
selenium, meta-analysis, cattle, milk, 324
methionine, milk protein, tracer, 2835
selenomethionine, glutathione peroxidase, bovine, mammary epithelial cell, 2670
semi-hard goat cheese, conjugated linoleic acid, milk fat depression, 2534
sensory analysis, inulin, dairy dessert, flow behavior, 4188
sensory characteristic, probiotic cheese, multivariate analysis, secondary proteolysis, 2455
sensory evaluation, milk, fish oil, flavor, 1378
sensory properties, Halloumi cheese, bovine milk, ovine milk, 4135
sensory quality, acceptability, camel milk, flavored yogurt, 857
yogurt, date fiber, 5403
serology, goat and cow milk, goat and cow milk lactosera, allergenicity, 837
serum insulin, propylene glycol, ruminal fermentation, plasma glucose, 4555
serum parameter, dried yeast, sheep milk, aflatoxin, 4997
serum protein, apparent efficiency of absorption, colostrum, IgG, 4565
flavor, microfiltration, whey protein, 4773
protein fractionation, microfiltration, flux, 1361
set yogurt, dissolved oxygen, fermentation, yogurt manufacture, 4112
shade, sprinkler, environment, dairy cattle, 506
sheep, cereal supplement, conjugated linoleic acid, pasture, 3964
sheep milk, aflatoxin, serum parameter, dried yeast, 4997
shelf life, cholesterol-reduced yogurt, nanopowdered chitosan, cross-linked β-cyclodextrin, 5907
Fior di Latte cheese, active coating, modified-atmosphere packaging, 887
milk, lauric arginate, 4207
Stracciatella cheese, modified-atmosphere packaging, 483
short- and medium-chain fatty acid, butteroil, fatty acid ethyl ester, fractionation, 1840
shortened dry period, bovine somatotropin, milk production, 5503
silage, bioavailability, cattle, iron, 2896
silage, *Lactobacillus buchneri*, molasses, aerobic stability, 690
spoilage, 1174
mineral absorption, nonlactating cow, dietary cation-anion difference, 2067
silver staining, milk fat globule membrane protein, isolation, sodium dodecyl sulfate-PAGE, 3592
simulation, forage management, no-till, phosphorus, 4086
single nucleotide polymorphism, bovine, parentage testing, pedigree record, 369
genetic evaluation, best linear unbiased predictor, genomic selection, 4648
lifetime net merit, predicted transmitting ability, genotyping, 5248
quantitative trait loci, calving trait, genomic selection, 2931
genomic prediction, genotyping, 3431
sire evaluation, Mexico, selection response, milk production, 5270
skin lesion, freestall, welfare, dairy cattle, 5487
slaughter value, antibody profile, *Mycobacterium avium* ssp. *paratuberculosis*, slaughter weight, 4340
slaughter weight, slaughter value, antibody profile, *Mycobacterium avium* ssp. *paratuberculosis*, 4340
SLC3, SLC6, and SLC7, bovine, regulated gene expression, 1124
small sample volume, lactose, high-performance liquid chromatography, mouse milk composition, 632
sodium, potassium, dietary cation-anion difference, lactation, 2711
sodium dodecyl sulfate-PAGE, silver staining, milk fat globule membrane protein, isolation, 3592
sodium sesquicarbonate, buffer, dairy cow, 3354
sodium-butyrate and flavomycin as growth promoters, maturation of gastrointestinal tract, cholescystokinin/gastrin family peptides and insulin-like growth factor-I, heat shock protein, 1038
sole ulcer, lying behavior, gait score, lameness, 4365
white line disease, digital dermatitis, multilevel model, 1971
sole ulceration, cytokine, growth factor, 5977
solid-associated bacteria, $^{15}N$, bacterial diversity, detachment procedure, 5659
solid-phase microextraction, flavor, bleach, whey protein concentrate, 5917

somatic cell, Chile, dairy, fertility, 1575
microbiological quality, bulk tank milk, 4239
somatic cell count, body weight, dairy cow, body condition score, 4386
dairy cow, zinc, milk production, 2128
dairy flock, antibiotic dry therapy, milking type, 156
distribution, mastitis, 1253
divergent selection, dairy sheep, mastitis, 1203
electrical resistance, neural network, mastitis, 1493
longevity, survival analysis, dairy sheep, 6160
on-farm test, subclinical mastitis, 990
organic farming, dairy cow, 3775
pathogen specific, genetic parameter, mastitis, 3457
risk factor, body condition score, hyperkeratosis, 3106
subclinical mastitis, production loss, dairy cow, 3124
total bacterial count, dairy goat, bulk milk, 4355
somatic cell score, dairy cow, CXCR1, 4018
linkage disequilibrium, *Bos taurus* autosome 18, mastitis, 4046
somatotropic axis, genetic selection, nutrient partitioning, 526
Holstein-Friesian, liver, gene expression, 5229
somatotropin, metabolism, hyperthermia, heat stress, 1986
n-3 fatty acid, follicular dynamic, 4876
hepatic gene expression, 4889
lactation, 4852
sonication, ultrasound, whey protein, heat stability, 5353
sorting, dry matter content, dairy cow, 3292
sorting, heifer, component feeding, TMR, 1161
soybean meal, amino acid digestibility, rumen-undegradable protein, 4489
soybean oil, drinking water, transition period, glycerol, 698
rumen microbial diversity, continuous culture, ionophore, 4467
soymilk, bovine milk, fermentation characteristic, *Lactobacillus casei*, 2468
spatial epidemiology, raw milk quality, wash water quality, 3714
specific immune milk, immunoglobulin G, antigen-release device, implantation, 100
speculum, Metricheck, clinical endometritis, diagnostic method, 5429
sphingomyelin, supercritical fluid extraction, phospholipid, buttermilk lipid, 2373
splanchnic, amino acid, glucose, dairy cow, 3233
spline regression, Gibbs sampler, heterosis by environment interaction, reaction norm model, 2204
spline transformation, dairy cattle, lameness, limb movement variable, 2539
spoilage, silage, *Lactobacillus buchneri*, 1174
spontaneous heating, digestibility, dry matter loss, hay, 2853
spray-drying, powder physical property, free fat, structure, 58
sprinkler, environment, dairy cattle, shade, 506
stage of pregnancy, preadjustment, test-day model, pregnancy status, 2270
test-day model, days open, days pregnant, 1300
stall design, cow comfort, lameness, udder cleanliness, 3074
stall maintenance, dairy cattle, cow comfort, standing behavior, 1979
standing, validation, activity, lying, 3397
standing behavior, stall maintenance, dairy cattle, cow comfort, 1979
stanniocalcin-1, transition period, immune function, leptin, 1900
*Staphylococcus aureus*, biocontrol, bacteriophage, dairy product, 3019
diagnostics, subtyping, mastitic, 1442
starch, alfalfa, protein, digestibility, 5595
corn, digestibility, lactating cow, 4541
starchy pellet, robotic milking, individual feeding, milking frequency, 2317
starter, calf, corn, processing, 782
fatty acid, calf, 670
statistical process control, electrical conductivity, health monitoring, milk yield, 5964
steam-flaked corn, ground corn, ryegrass silage, corn silage, 1117
steam-rolling, lactating cow, barley grain, grinding, 3299
stearoyl-CoA desaturase 1, desaturase index, fatty acid composition, Jersey, 1220
stearoyl-CoA desaturase enzyme, genetic parameter, milk fatty acids, conjugated linoleic acid, 392
stearoyl-coenzyme A desaturase, conjugated linoleic acid, lipid metabolism, 5167
stem cell, mammary gland, milk replacer, prepubertal heifer, 5937
stereoisomer, dairy cow, neutrophil, vitamin E, 720
stillbirth, weight, dairy, calf, 2580
stillborn, crossbreeding, dystocia, 6167
stochastic dominance, reproductive management, decision support, 1290
storage, dried dairy ingredient, whole milk powder, flavor, 2409
Stracciatella cheese, modified-atmosphere packaging, shelf life, 483
strain, bacteriocin, *Streptococcus uberis*, mastitis, 5467
concentrate supplementation, grazing dairy cow, milk fat composition, 247
stray voltage, meta-analysis, contact current, dairy cow, 5951
*Streptococcus equi* ssp. *zooepidemicus*, goat, horse, mastitis, 943
*Streptococcus thermophilus*, exopolysaccharide, yogurt, 477
*Streptococcus uberis*, mastitis, bovine, microarray, 117
strain, bacteriocin, 5467
stretchwater, lactate, galactose, Mozzarella cheese whey, 5371
strong ion difference, calf, milk clotting, oral rehydration solution, 1649
rehydration, calf diarrhea, oral electrolyte solution, 296
strontium-90, cheese, milk, cesium-137, 5363
structure, spray-drying, powder physical property, free fat, 58
yield, cheese, brining, 4169

subacute ruminal acidosis, acarbose, dairy cow, milk yield, 4481
buffer block, 352
lipopolysaccharide, acute phase response, 1712
lipopolysaccharide translocation, acute phase response, 1060
subclinical endometritis, prostaglandin treatment, dairy cow, 4906
subclinical ketosis, β-hydroxybutyrate, diagnostic test, whole blood, 2618
feeding behavior, dry matter intake, dairy cattle, 4971
coagulase-negative staphylococci, epidemiology, dairy cow, 4962
production loss, dairy cow, somatic cell count, 3124
somatic cell count, on-farm test, 990
test-day model, production loss, new case, 599
subtyping, mastitic, *Staphylococcus aureus*, diagnostics, 1442
sucrose, sugar, Fermenten, rumen pH, 1725
transition period, postpartum, rumen pH, 3341
sugar, Fermenten, rumen pH, sucrose, 1725
sunflower seed, methane, flaxseed, canola seed, 2118
supercritical fluid extraction, milk fat globule membrane, milk phospholipid, 458
diatomaceous earth, 5933
phospholipid, buttermilk lipid, sphingomyelin, 2373
supplemental fat, energy intake, forage, fiber, 6144
supplemented diet, α-tocopherol, linseed, cheese odor compound, 3040
survey, beef quality assurance, dairy cow, 1265
survival, predictive ability, model comparison, 5730
survival analysis, conjugated linoleic acid, reproduction, fatty acid, 2662
dairy sheep, somatic cell count, longevity, 6160
foot lesion, culling, 2572
survival rate, fertility, dairy cow, gene–gene interaction, 6186
fertilization rate, candidate pathway, candidate gene, 2238
susceptibility, resistance, mastitis, antimicrobial, 2589
Swiss cheese, infrared, chemometrics, adjunct culture, 3575
synchrotron, heat-induced protein structure and fraction, nutrient availability, rumen and intestine, 3319
systemic anaphylaxis, immunoglobulin E, milk protein, allergy, 4738

## T

tannin, methane, methanogenic archaea, protozoon, 5512
target range, milk urea, test-day model, autoregression, 3529
teat apex, transfer RNA-intergenic spacer polymerase chain reaction, bovine coagulase-negative staphylococci, milk, 3204
telemetry, ruminal temperature, ruminal pH, 5697
temperature-humidity index, dairy cattle, rectal temperature, heat stress, 109
dairy cow, mortality, season, 3781
test-day model, autoregression, target range, milk urea, 3529
days open, days pregnant, stage of pregnancy, 1300
pregnancy status, days open, days pregnant, 2947
stage of pregnancy, preadjustment, 2270
production loss, new case, subclinical mastitis, 599
test-day record, variance-component estimation, random regression model, 5314
tetra-primer amplification refractory mutation system-polymerase chain reaction, marker-assisted selection, DGAT1, polymerase chain reaction-restriction fragment length polymorphism, 773
texture, rheology, low fat, cheese, 4756
therapy, nonsteroidal antiinflammatory drug, clinical mastitis, 4421
thermolability, oocyte, embryo, heat stress, 563
thermophilic starter, fresh cheese curd, aromatic starter strain, 1856
thermostable, immobilization, lactose hydrolysis, β-galactosidase, 491
thiazolidinedione, peroxisome proliferator-activated receptor-γ, transition cow, 3623
threshold model, alternative measures, mastitis, heritability, 3402
conception rate, heritability, random regression, 2922
genetic trend, twinning rate, linear model, 3411
tie stall, free stall, foot lesion, risk factor, 1404
behavior, bedding, cow comfort, 2684
welfare, cattle, lameness, 1567
tight junction, dromedary, lactation, milk secretion, 1452
proteinase, apoptosis, dairy cow, 1998
time at pasture, grazing behavior, pasture intake, dairy cow, 3331
timed artificial insemination, natural service , reproductive performance , dairy cow, 5456
dairy cow, progesterone, reproduction, 5436
natural service, reproductive performance, dairy cow, 5456
timothy, alfalfa, near-infrared reflectance spectroscopy, neutral detergent-soluble carbohydrate, 1702
timothy hay, hypocalcemia, EDTA challenge, dietary cation-anion difference, 238
TMR, sorting, heifer, component feeding, 1161
α-tocopherol, linseed, cheese odor compound, supplemented diet, 3040
tocopherol, mixed micelle, milk fat globule membrane, lycopene, 2524
Torque teno virus, milk, Mozzarella cheese, water buffalo, 5928
total bacterial count, BactoScan flow cytometry, milk preservative, goat milk, 4841
dairy goat, bulk milk, somatic cell count, 4355
total lactation persistency, criterion, restricted index, total milk yield, 2915
total milk yield, total lactation persistency, criterion, restricted index, 2915
total mixed ration, dairy cow, extended lactation, pasture and grain diet, 1479

total nonstructural carbohydrate, alfalfa diurnal cutting, bacterial protein synthesis, dairy cow, 1092
traceability, deoxyribonucleic acid detection, feed, milk, 5583
tracer, selenium, methionine, milk protein, 2835
traffic, behavior, feeding, management, 1272
*trans*-cinnamaldehyde, antimicrobial, mastitis, 1423
*trans* fatty acid, conjugated linoleic acid, lactation, milk fat, 4317
transcription regulator, transcriptomics, nuclear receptor, 4290
transcriptomics, milk fat, internal control gene, 2007
nuclear receptor, transcription regulator, 4290
transfer RNA-intergenic spacer polymerase chain reaction, bovine coagulase-negative staphylococci, milk, teat apex, 3204
transgenic cow, milk, lysostaphin, processing, 444
transition, amino acid, gluconeogenesis, dairy cow, 3306
competition, dry matter intake, behavior, 3116
dairy cow, glucose, metabolism, 1071
transition cow, dietary cation-anion difference, potassium, calcium, 5677
haptoglobin, metritis, 621
pyrexia, metabolism, flunixin meglumine, 1963
thiazolidinedione, peroxisome proliferator-activated receptor-$\gamma$, 3623
transition period, gene expression, cow, liver, 1924
glycerol, soybean oil, drinking water, 698
immune function, leptin, stanniocalcin-1, 1900
postpartum, rumen pH, sucrose, 3341
translocation, cattle, aneuploidy, chimerism, 3481
transrectal ultrasonography, pregnancy-associated glycoprotein, resynchronization, 3643
traveling salesman problem, cows, artificial insemination, mathematical optimization, 2306
treatment, risk factor, cephalosporin, clinical mastitis, 1941
trend, heat stress, conception rate, fertility, 4641
triglyceride, ice cream pasteurization, dairy emulsion, whipping, 3566
trimming method, claw health and conformation, locomotion, alley floor, 960
Tri-plate, Petrifilm Staph Express, mastitis, culture, 5326
true protein, microbial protein synthesis, rumen-degraded protein, nonprotein nitrogen, 2822
tuberculosis, genetics, heritability, *Mycobacterium bovis*, 3447
twinning, heritability, gestation length, breed, 2259
twinning rate, linear model, threshold model, genetic trend, 3411
two-dimensional cartography, equine $\beta$-casein, deamidation, phosphorylation, 2389

## U

udder cisternal size, once-daily milking, milk quality, dairy goat, 5447
udder cleanliness, stall design, cow comfort, lameness, 3074
udder firmness, behavior, dry off, milking frequency, 3194
udder health, automatic milking, conventional milking, housing system, 3696
crossbreeding, immune response, Norwegian Red, 749
udder hygiene score, clinical mastitis, risk factor, hyperkeratosis, 2551
udder linear measurement, milk production trait, Awassi sheep, 4613
ultra-high-pressure homogenization, proteolysis, yogurt, capillary electrophoresis, 71
fat, *Listeria monocytogenes*, 5396
ultrasound, whey protein, heat stability, sonication, 5353
ureagenesis, gene expression, glucagon, gluconeogenesis, 5092
urine, forage tannins, manure chemistry, feces, 1765
urine collection, apparatus, method, 5224

## V

vaccenic acid, conjugated linoleic acid, grazing, rumenic acid, 3874
vacuum, b-phase duration, pulsation, liner compression, 913
validation, activity, lying, standing, 3397
bovine intramammary infection, real-time PCR, 952
calf disease, monitoring, 1660
rumination, feeding behavior, dairy cow, 6052
whey yield, whey fat, curd-syneresis sensor, 5386
Val-Pro-Pro, Ile-Pro-Pro, angiotensin-converting enzyme-inhibiting peptide, cheese ripening, 826
value-added milk product, casein structure, casein molecular model, protein functionality, 1338
variance component, automated milking system, milking frequency, 3422
random regression model, heat stress, 5702
variance components model, quantitative trait locus mapping, inbreeding, dairy cattle, 765
variance-component estimation, random regression model, test-day record, 5314
variation factor, dairy ewe, fatty acid, conjugated linoleic acid, 3791
vegetable oil, dairy cow, grazing, milk fatty acid, 4530
virgin heifer, genetic correlation, reproductive trait, yield trait, 4055
virulence factor gene, biofilm, puerperal cow, *Escherichia coli*, 6000
virus, risk factor, calf, respiratory disease, 5139
vitamin $B_{12}$, methionine and glucose kinetics, dairy cow, folic acid, 677
rumen-protected methionine, dairy cow, folic acid, 1685
ruminal synthesis, intestinal absorption, dairy cow, 4524
vitamin D status, neonatal nutrition, preruminant calf, 5692
vitamin E, stereoisomer, dairy cow, neutrophil, 720
volatile fatty acid absorption, forage-to-concentrate ratio, gene expression, ruminal pH, 2767
volatile fatty acid, cattle, G protein-coupled receptors GPR41 and GPR43, 2696

## W

wash water quality, spatial epidemiology, raw milk quality, 3714
waste milk, calf, herd health, 3503
wastewater, gas chromatography-mass spectrometry, milk processing, recycled water, 3484
water buffalo, Torque teno virus, milk, Mozzarella cheese, 5928
water intake, dry matter intake, dairy cow, lactation curve, 4072
weaning, dairy calf, health status, rumen development, 645
weight, dairy, calf, stillbirth, 2580
weight distribution, lameness, welfare, dairy cow, 581
welfare, cattle, lameness, tie-stall, 1567
  dairy cattle, skin lesion, freestall, 5487
  dairy cow, weight distribution, lameness, 581
wet corn gluten feed, by-product, dairy cattle, alfalfa, 3510
wheat, dairy cow, digestibility, fermentation, 3825
whey fat, curd-syneresis sensor, validation, whey yield, 5386
whey glycoprotein, lactosylation, Maillard reaction at low pH, emulsion, 35
whey protein, heat denaturation, microfluidization, functional property, 1387
  heat stability, sonication, ultrasound, 5353
  insulin-like growth factor-I, osteoblast, differentiation, 3014
  mineral, microfiltration, casein micelle, 5357
  serum protein, flavor, microfiltration, 4773
whey protein concentrate, high hydrostatic pressure, low-fat whipping cream, foam stability, 3049
  solid-phase microextraction, flavor, bleach, 5917
whey yield, whey fat, curd-syneresis sensor, validation, 5386
whipping, triglyceride, ice cream pasteurization, dairy emulsion, 3566
white line disease, digital dermatitis, multilevel model, sole ulcer, 1971
whole blood, subclinical ketosis, β-hydroxybutyrate, diagnostic test, 2618
whole milk powder, flavor, storage, dried dairy ingredient, 2409
whole pasteurized milk, β-cyclodextrin, cholesterol removal, 863

## Y

yak milk, bovine milk, ND1 gene, polymerase chain reaction, 1354
yeast, mannanoligosaccharide, cottonseed hull, calf, 790
yeast, *Saccharomyces cerevisiae*, ruminant, meta-analysis, 1620
yeast culture, first lactation, digestibility, forage-to-concentrate ratio, 5100
  metabolism, heat stress, hyperthermia, 935
yield, cheese, brining, structure, 4169
yield trait, virgin heifer, genetic correlation, reproductive trait, 4055
yogurt, capillary electrophoresis, ultra-high pressure homogenization, proteolysis, 71
  date fiber, sensory quality, acceptability, 5403
  gelation, pH, fermentation time, 2977
  *Streptococcus thermophilus*, exopolysaccharide, 477
yogurt manufacture, set yogurt, dissolved oxygen, fermentation, 4112
*Yucca schidigera*, *Quillaja saponaria*, methane, rumen fermentation, 2809

## Z

zinc, milk production, somatic cell count, dairy cow, 2128
